HONORARY DEGREE RECIPIENT

Michael Bloomberg

Internationally renowned business leader and statesman Michael Bloomberg exemplifies innovation and entrepreneurship in his public service, professional endeavors, and philanthropy. Mayor of New York City from 2002 to 2013, he now serves the United Nations as its Secretary-General's Special Envoy for Cities and Climate Change. He revolutionized information technology in 1981 when he founded Bloomberg L.P. and unveiled the Bloomberg Terminal, which organizes and analyzes real-time financial and economic data. Today, Bloomberg L.P. has more than 16,000 employees in 192 locations around the world, delivering business and financial information, news, and insights to a global audience. Born in Boston, Massachusetts, Mr. Bloomberg grew up in nearby Medford. He received a B.S. degree in electrical engineering (1964) from Johns Hopkins University, where he was class president, and an M.B.A. (1966) from Harvard Business School. Prior to launching Bloomberg L.P., he worked at the securities brokerage Salomon Brothers. His philanthropic commitment to the arts, education, the environment, government innovation, and public health has grown along with his business. Mr. Bloomberg has donated more than \$4.3 billion, including \$100 million to help eradicate polio, \$250 million to improve road safety, and \$600 million to reduce global tobacco use. His tobacco control initiative has saved 25 million lives since its launch in 2007. He has served on the boards of numerous charitable, cultural, and educational institutions, including Johns Hopkins, where he chaired the board of the Bloomberg School of Public Health. As New York's mayor, he led the city back from the attacks of September 11, 2001, rebuilding Lower Manhattan and revitalizing long-neglected neighborhoods. He turned around the city's public education system, raising high school graduation rates by more than 40 percent, while cutting crime by 32 percent and driving job growth to record highs. He created hundreds of acres of new parks, revitalized the waterfront, and championed public art. He also enacted the city's first smoking ban for all commercial establishments and ended the use of artificial trans fats in restaurants, policies that have since spread across the nation. During his terms as mayor, the average life expectancy of residents increased three years, two years more than the national average. He cut pollution and reduced the city's carbon footprint by 19 percent. As the U.N.'s Special Envoy, Mr. Bloomberg helps cities set and reach more ambitious climate goals. He also is president of the board of the C40 Climate Leadership Group, a network of megacities working to reduce greenhouse gas emissions. He is chairman of the National September 11th Memorial and Museum. Mr. Bloomberg has received, among other accolades, the Genesis Prize and, in 2014, Queen Elizabeth II named him an honorary knight, and he received France's top civilian honor, the Legion of Honor.

Mr. Bloomberg, you inspire us with your courage and visionary leadership. You are deeply committed to quality education and public health and have generously invested your talent and resources to solve seemingly intractable social and environmental problems. Additionally, you are a role model for civic leaders, students, and others who aspire to be agents of change. The University of Michigan celebrates your storied career and contributions to business, philanthropy, and effective government, and is proud to present to you the honorary degree, Doctor of Laws.

Michael Brown

Mr. Brown will receive his honorary degree at the University of Michigan-Dearborn's commencement ceremony on May 1, 2016.

Nationally prominent social entrepreneur Michael Brown is chief executive officer and co-founder of City Year, a nonprofit organization dedicated to engaging young people in a year of national service. Armed with a vision for young adults from all backgrounds to perform a year of community service, Mr. Brown and his Harvard Law School roommate Alan Khazei launched City Year in Boston in 1988. Since then more than 22,500 City Year corps members have contributed approximately 33.5 million hours of service and earned access to \$71 million in college scholarships through the AmeriCorps National Service Trust. This year, 3,000 City Year AmeriCorps members are serving as tutors, mentors, and role models in schools in 27 United States cities with high dropout rates, creating an environment in each school that nurtures students and helps them cope with personal and academic challenges. City Year also has affiliates in South Africa and the United Kingdom. Born and raised in Boston, Massachusetts, Mr. Brown received an A.B. degree (1983) from Harvard College and a J.D. (1988) from Harvard Law School. As an undergraduate, he took a year off school to work for Congressman Leon Panetta and became intrigued with the representative's proposal for a national community service program. Mr. Brown and Mr. Khazei began City Year with 50 recruits who served in various community settings and received small stipends for living expenses. The initiative inspired President Bill Clinton to sign the National Community Service Trust Act in 1993 and create AmeriCorps. Since then, more than 900,000 Americans have served as AmeriCorps volunteers. In 2007, City Year sharpened its focus to serve children at risk of joining the million U.S. students who drop out of school each year. City Year addresses the early warning indicators that research has shown make it possible to identify potential high school dropouts in elementary school: poor attendance, disruptive behavior, and failing grades in math or English. A recent third-party evaluation showed that schools with City Year teams were up to two to three times more likely to increase English and math proficiency rates compared to similar schools without the program. City Year is supported by the Corporation for National and Community Service, school district partnerships, and donations from corporations, foundations, and individuals. A renowned speaker on issues relating to youth policy and national service, Mr. Brown is a past board member of Independent Sector, a coalition of nonprofits, foundations, and corporate giving programs. Among other honors, Mr. Brown has received Independent Sector's John W. Gardner Leadership Award, the American Institute for Public Service Jefferson Award, Boston Bar Association Public Service Award, Harvard Law School Association Award, and Reebok Human Rights Award. *U.S. News & World Report* selected him one of America's Best Leaders and *The NonProfit Times* listed him among the Power and Influence Top 50 in 2015.

Mr. Brown, you are one of the nation's most respected social entrepreneurs. Under your leadership, City Year has nurtured the academic aspirations of thousands of school children while serving as a national service model that promotes democracy, prepares young adults from diverse backgrounds to achieve the American Dream, and moves the United States closer to a culture that espouses community service opportunities for all. The University of Michigan is pleased to present to you the honorary degree, Doctor of Laws.

HONORARY DEGREE RECIPIENT

Mary-Claire King

Pioneering molecular geneticist Mary-Claire King is a world leader in cancer genetics and the use of genomics to address social injustice. Dr. King, the American Cancer Society Professor of Medicine (Medical Genetics) and of Genome Sciences at the University of Washington, identifies and characterizes critical genes in families and populations. She led the discovery and identification of BRCA1, a gene that when mutant increases the vulnerability of women to breast cancer. The 1990 proof of existence of BRCA1, and its cloning in 1994, were early steps in the application of human genetics to identify and treat inherited disease. She has also led the campaign to bring testing for BRCA1 to the clinic and advocates that all women, even those without a family history of the disease, be offered testing for mutations predisposing to breast cancer. Additionally, she has spoken persuasively about the harm of patenting genes, which limits their clinical use. Born in Wilmette, Illinois, Dr. King earned a B.A. degree in mathematics (1967) from Carleton College and a Ph.D. in genetics (1973) from the University of California, Berkeley, where she demonstrated that humans and chimpanzees are 99 percent genetically identical. After postdoctoral training at the University of California, San Francisco, she held faculty appointments in genetics at Berkeley from 1976 until 1995, then joined the faculty at the University of Washington. Dr. King has published more than 300 journal articles. She works with scientists around the world, including at the University of Michigan, to identify genetic causes of hearing loss and cloned one of the first genes for non-syndromic deafness. She also studies genetic bases of influences on schizophrenia and severe congenital disorders. In 1984, in response to requests from grandmothers in Argentina, she developed the use of mitochondrial DNA to identify children who were stolen from dissidents' families during Argentina's Dirty War between 1975 and 1983. She also has used these genetic tools to identify victims of violence in Bosnia, Cambodia, El Salvador, Ethiopia, Guatemala, and Rwanda. A past president of the American Society for Human Genetics, she contributes to the Human Genome Diversity Project, which seeks to advance understanding of human evolution and historical migrations. Dr. King is a member of the American Academy of Arts and Sciences, American Philosophical Society, and the National Academy of Sciences. Among other honors, she received the Peter Gruber Foundation Genetics Prize, the A.H. Heineken Prize for Medicine from the Royal Netherlands Academy of Arts and Sciences, and the Paul Ehrlich and Ludwig Darmstaedter Prize. She was recognized in 2014 with the Lasker Foundation Special Achievement Award in Medical Science.

Dr. King, through your internationally recognized advances in basic and applied molecular genetics you have transformed the diagnosis and treatment of breast cancer and other diseases. You also masterfully apply genomic tools to address global humanitarian crises, providing a role model for students in the sciences and all who are committed to achieving a more just world. We celebrate your leadership and contributions to medical science, higher education, and human rights. The University of Michigan is pleased to present to you the honorary degree, Doctor of Science.

Michele Oka Doner

Acclaimed artist and University of Michigan alumna Michele Oka Doner is renowned for her pioneering and multidisciplinary contributions to visual culture and the fresh lens she brings to the natural world and its processes. Her best-known work, *A Walk on the Beach* (1995–2010) at Miami International Airport, celebrates her native Florida. Ms. Oka Doner was born in Miami Beach, where she spent her childhood closely observing nature. She earned a B.S.Des. degree (1966) and an M.F.A. (1968) from the College of Architecture and Design, now the Penny W. Stamps School of Art & Design. For five decades, she has conveyed a reverence for the physical and spiritual through her symbolic language, a prescience of today's growing ecology movement. A turning point in her career occurred in 1987, when she won a national competition and commission for *Radiant Site* (1990), a wall of 11,000 gold luster tiles at New York City's Herald Square subway station. More than 30 other major public commissions followed, including *Flight* (1997) at Ronald Reagan Washington National Airport and *Wave & Gate* (2003) at the Dan M. Russell, Jr. Federal Courthouse in Gulfport, Mississippi. Her functional objects, furniture, jewelry, prints, and sculptures are treasured by private collectors and are in public collections worldwide, including at the Art Institute of Chicago, the Detroit Institute of Arts, the Musée des Arts Décoratifs at the Louvre in Paris, The Metropolitan Museum of Art in New York City, London's Victoria and Albert Museum, and the Whitney Museum of American Art. She has contributed significantly to the University through her public art, gifts to the Museum of Art (UMMA), and as an artist-in-residence and a Penny Stamps Speaker Series presenter. The Ann Arbor campus is home to, among other works, *Angry Neptune*, *Salacia*, and *Strider* (2008) outside UMMA, *Science Benches* (1990) on Ingalls Mall, *Positron* (1996) near the Harrison M. Randall Laboratory, and *Ancient Arb* (2011) at C.S. Mott Children's Hospital. Ms. Oka Doner has co-authored, among other books, the social history *Miami Beach: Blueprint of an Eden* (2007). Her new book, *Into the Mysterium* (2016), celebrates the beauty and inherent life force in the increasingly endangered pelagic ecosystem. She also brings an illuminating underwater perspective to her set and costume designs for Miami City Ballet's 30th anniversary production this spring of *A Midsummer Night's Dream*. Ms. Oka Doner serves on the UMMA National Leadership Council, is a founding board member of the Wolfsonian–Florida International University Museum, and is a former trustee of the Pratt Institute and *BOMB Magazine*. She has received numerous accolades, including the Pratt Institute Legends Award, United Nations Society of Writers and Artists Award of Excellence, and the Stamps School's Distinguished Alumni Award.

Ms. Oka Doner, you are one of America's most distinguished and prolific artists. Through your transformative art you invite individuals to see the world in new ways and engage at a deeper level with the relentless forces of nature and life. You also exemplify the success that comes to those with vision, drive, and an openness to creative challenges. The University of Michigan is delighted to welcome you back to campus and to present to you the honorary degree, Doctor of Arts.

HONORARY DEGREE RECIPIENT

Beverly Daniel Tatum

Spelman College President Emerita, psychologist, and University of Michigan alumna Beverly Tatum is a distinguished and inspirational leader in higher education and a renowned race relations expert. Through her research on development of racial identity she has increased understanding of the influence of race and privilege in educational settings and sparked crucial conversations about how race frames society's norms and power dynamics. Born in Tallahassee, Florida, she grew up in Bridgewater, Massachusetts, where she often was the only black student in class. She earned a B.A. degree in psychology (1975) from Wesleyan University, M.A. (1976) and Ph.D. (1984) in clinical psychology from U-M, and M.A. in religious studies (2000) from Hartford Seminary. She taught at the University of California, Santa Barbara, and Westfield State University before joining the Mount Holyoke College faculty in 1989, where she served as dean and acting president. President of Spelman from 2002 until she retired in 2015, Dr. Tatum led the college through an innovative and dynamic period during which alumnae giving and student scholarship support tripled. The Gordon Zeto Fund for International Initiatives, established in 2008, expanded travel opportunities for faculty and students and increased funding for international students. Today Spelman is among the nation's top 100 liberal arts colleges. She currently is updating her acclaimed *"Why Are All the Black Kids Sitting Together in the Cafeteria?" And Other Conversations about Race* (1997), which addresses racial identity development in both whites and youth of color. The National Association of Multicultural Education selected it the 1998 Multicultural Book of the Year. She also wrote *Assimilation Blues: Black Families in White Communities: Who Succeeds and Why?* (1987) and *Can We Talk About Race? And Other Conversations in an Era of School Resegregation* (2007). She has provided diversity training to hundreds of individuals and groups and led multicultural organizational development sessions around the country. A role model and mentor, Dr. Tatum has encouraged many outstanding students to pursue advanced degrees at Michigan. She also has enriched the campus as a King-Chávez-Parks Visiting Professor and presenter at the College of Literature, Science, and the Arts theme semester commemorating the 50th anniversary of *Brown v. Board of Education*. Dr. Tatum is a member of the American Philosophical Society and an American Psychological Association (APA) fellow. She received the APA's highest honor, the Award for Lifetime Contributions to Psychology, in 2014. She also has been recognized with the American Council on Education Donna Shavlik Award, Brock International Prize in Education, and Carnegie Academic Leadership Award. She serves on the boards of the Educational Testing Service, Georgia Power, Institute for International Education, and Teach for America, as well as a number of Atlanta organizations, including the Georgia Early Education Alliance for Ready Students and Woodruff Arts Center.

Dr. Tatum, through your contributions to Spelman College and higher education, scholarship, and frank writing about racial identity development you have expanded awareness and understanding of the influence of racism on individuals and educational and other organizations. One of Michigan's most distinguished alumnae, you have artfully melded research, teaching, and activism to advance the dream of a more just and equitable society. The University of Michigan is pleased to welcome you back to campus and proud to award you the honorary degree, Doctor of Laws.

UNIVERSITY FLAGS AND FLAG BEARERS

The flags behind the platform are arranged in the order in which the schools and colleges they represent were founded. As the audience faces the flags, the arrangement from left to right is the following:

College of Literature, Science, and the Arts	Lehman D. Robinson, Jr.
Medical School	Bella R. Shah
Law School	Rachel Ann Jankowski
School of Dentistry	Samantha Bordener
College of Pharmacy	Karthik Pisupati
College of Engineering	Olivia Elaine Kuenzi
Horace H. Rackham School of Graduate Studies	Alfred Ogola Okello
A. Alfred Taubman College of Architecture and Urban Planning	Kathryn M. Albee
School of Education	Claire C. Forhan
Stephen M. Ross School of Business	Amber Michelle Blanks
President's flag	<i>on stage</i>
University flag	<i>on stage</i>
Regents' flag	<i>on stage</i>
School of Natural Resources and Environment	Cody R. Yarbrough
School of Music, Theatre & Dance	Cassidy Chey Goldblatt
School of Nursing	Taylor Nicholson
School of Public Health	Jhordan O. Wynne
School of Social Work	Brett Jones
University of Michigan-Flint	Thomas G. Steele
University of Michigan-Dearborn	Abeer Yassine
School of Information	Mojolaoluwa Faith Bolaji
Penny W. Stamps School of Art & Design	Mariah Nicole Gardziola
School of Kinesiology	Claire Victoria Shabet
Gerald R. Ford School of Public Policy	Marjory Anne Marquardt

THE UNIVERSITY MACE

The University's mace, a symbol of authority, is carried at the head of academic processions on such important ceremonial occasions as commencements, convocations, and inaugurations. The mace being used today was given to the University in 1968 by the Senior Board, representing all the undergraduate schools and colleges. Crafted of red oak and trimmed with silver, the mace features the seals of the University and of the State of Michigan. Also engraved on the mace are the names of the University Presidents.

ACADEMIC COLORS

The colors of the various disciplines are as follows:

Architecture and Urban Planning	<i>blue violet</i>
Business Administration	<i>drab</i>
Dentistry	<i>lilac</i>
Education	<i>light blue</i>
Engineering	<i>orange</i>
Fine Arts	<i>brown</i>
Information	<i>lemon</i>
Kinesiology	<i>sage green</i>
Law	<i>purple</i>
Literature and Arts	<i>white</i>
Medicine	<i>green</i>
Music	<i>pink</i>
Natural Resources and Environment	<i>russet</i>
Nursing	<i>apricot</i>
Pharmacy	<i>olive green</i>
Philosophy	<i>dark blue</i>
Public Health	<i>salmon pink</i>
Public Policy	<i>peacock blue</i>
Science	<i>golden yellow</i>
Social Work	<i>citron</i>

Mingled colors distinguish combined curriculums.

ACADEMIC DRESS AND CUSTOM

The colorful gowns and hoods worn by faculty members at commencement and other academic ceremonies represent the degrees, disciplines, and alma maters of the wearers. The American academic costume tradition, imported from England, dates to Colonial days.

Gowns

Bachelor's or master's degree gowns traditionally are black, as are many doctoral gowns in the United States. Some universities prescribe that their graduates wear gowns of another solid color such as blue, crimson, or green. Gowns differ in sleeve cut and trim. For example, the bachelor's gown has long, pointed sleeves while the master's gown has oblong sleeves. Doctoral gowns, with their distinctive bell-shaped sleeves, feature velvet panels down the front and around the neck, as well as crossbars of velvet on the sleeves. Colored trim denotes the field or discipline in which the degree was earned. Usually only a single degree from one institution is indicated by a garment. If more than one degree is held, the gown and hood of the higher or highest degree usually are worn.

Hoods

The hood most precisely describes the wearer's level of degree earned, the major field of learning, and the alma mater. The level of the degree held is indicated by the hood's shape and size and the width of its velvet or velveteen trimming. The bachelor's, master's, and doctor's hoods are 36 inches, 42 inches, and 48 inches long, respectively. The velvet trim is two, three, and five inches wide, with the narrowest being for the bachelor's hood and the widest for the doctor's hood. The color of trim on the hood, as on the gown, identifies the major field of learning in which the degree was awarded. The hood is lined with the official colors of the college or university conferring the degree.

Caps

Caps vary in style from the traditional black mortarboard to eight-, six-, and four-corner tams, and Elizabethan-style caps. The mortarboard may be of any appropriate material, such as cotton, poplin, rayon, or silk, to match the gown. Velvet is reserved for holders of doctorates.

SCHOOLS AND COLLEGES OF THE UNIVERSITY

The order of presentation is by the year of founding.

College of Literature, Science, and the Arts

The College of Literature, Science, and the Arts, founded in 1841, was the first duly constituted college of the University of Michigan. Today, with more than 15,000 undergraduate and 2,000 graduate students, LSA is the largest of the University's schools and colleges, and it is still the heart of the campus. Distinguished in the humanities since its earliest years, the college became preeminent in the natural sciences during the early 20th century and went on to become a world leader in social science research. The college has always been dedicated to providing a richly diverse liberal arts education that prepares students to lead fulfilling lives as responsible citizens within a wide range of professional careers.

Medical School

Since opening its doors in 1850, the Medical School has been a leader in medical education, patient care, and biomedical research. In addition to its professional doctor of medicine program, the Medical School offers master's and doctoral degrees in the basic medical sciences. The school established the nation's first university-owned and -operated teaching hospital and created the first departments of pharmacology and human genetics in the United States. It also played an important role in the development of the electrocardiogram and in the development of iodized salt as a goiter preventive. The Medical School was among the first major American medical schools to graduate women and African Americans; today there are more practicing M.D.s from the University of Michigan than from any other medical school in the United States.

Law School

Founded in 1859, the Law School awarded its first bachelor of laws degrees in 1860. In 1870, the school became the second in the nation to confer a law degree on an African American candidate and the first major law school to admit a woman. In 1871, one of the school's graduates became the first woman with a law degree to be admitted to the bar. A national law school from its earliest years, the school's graduates work in every state of the union and in more than 73 countries, in business, as practitioners and professors, as legislators and members of Congress, and as distinguished civil servants and members of the judiciary.

School of Dentistry

Established in 1875, the School of Dentistry first granted the professional degree, doctor of dental surgery, the following year. A national leader in the training of professional dentists and long active in oral and craniofacial research, the school offers the doctor of dental surgery, master's degrees, and graduate clinical programs in several dental specialties and general dentistry. A doctoral degree is offered in oral health sciences and in an interdepartmental program in biomaterials. The School of Dentistry also offers baccalaureate and master's programs in dental hygiene.

College of Pharmacy

Established as a department in 1868, Pharmacy became a college in 1876, the first in any university in the United States. Today, the college has an average annual enrollment of 260 doctor of pharmacy and 70 graduate students, and is consistently ranked among the top pharmacy schools in the nation. The college offers the doctor of pharmacy degree; baccalaureate programs in medicinal chemistry and pharmaceutical sciences; and doctor of philosophy programs in medicinal chemistry, pharmaceutical sciences, and social and administrative sciences. Major areas of research include the biological, chemical, clinical, genomic, economic, and social aspects of drugs and therapeutic agents.

College of Engineering

Instruction began with a class in civil engineering in 1854. Historically, the College of Engineering has been a leader in establishing departments in emerging fields, including metallurgical engineering, naval architecture and marine engineering, electrical engineering, chemical engineering, aeronautical engineering, nuclear engineering, and computer engineering. Today, the college and its 60,000 alumni provide leadership in various technologies, healthcare, business, and the sciences, improving the quality of people's lives around the world.

Horace H. Rackham School of Graduate Studies

The Horace H. Rackham School of Graduate Studies oversees and coordinates graduate education, bringing together graduate students and faculty from across the institution to experience and take full advantage of the University as a scholarly community. The University awarded its first master of arts degree in 1849, first master of science degree in 1859, and first doctor of philosophy degree in 1876. Organized as a department in 1892, the School of Graduate Studies became an autonomous unit in 1913. In 1935, a generous gift from Horace H. and Mary A. Rackham included the site and construction of the Rackham Building for graduate studies and a substantial endowment for carrying on graduate work and research.

A. Alfred Taubman College of Architecture and Urban Planning

Michigan offered its first courses in architecture in 1876. The program became a department in 1913, and by 1931, the College of Architecture was established as a separate entity. During the 1940s, the college was one of the few schools in the country to consider research a necessary part of architectural education, and in 1946 it became the first to introduce a graduate program in urban planning. The college offers master of architecture, master of urban planning, and master of science degrees; bachelor of science and master of science degrees in architecture; and doctoral programs in architecture and in urban and regional planning. In 1999, the college was named in honor of A. Alfred Taubman, founder and chairman of The Taubman Company, Inc., and a longtime friend, supporter, and adviser to the college.

School of Education

The School of Education was founded in 1921, 42 years after the University established the first chair in any United States collegiate institution devoted to the "science and art of teaching." The school prepares students for professional careers in teaching and administration, and offers advanced training for researchers and practitioners at all levels of education. Teacher diplomas were first offered in 1874; the first master's degree in education was conferred in 1891, the first Ph.D. in 1902, and the first Ed.D. in 1938.

Stephen M. Ross School of Business

Building on faculty and course offerings that began in the latter part of the 19th century, the school was formally established in 1924. Today, at all levels of instruction—bachelor's, master's, doctoral, and executive education—its programs rank in the top five among American institutions. Each year nearly 1,000 new School of Business graduates enter careers as business professionals and teacher-scholars, joining the approximately 37,000 who already serve in leadership positions in business, government, and academic institutions throughout the world.

School of Natural Resources and Environment

The School of Natural Resources and Environment's overarching objective is to contribute to the protection of the Earth's resources and the achievement of a sustainable society. Through research, teaching, and outreach, faculty, staff, and students are devoted to generating new knowledge and developing policies, techniques, and skills to help practitioners manage and conserve natural resources to meet the full range of human needs on a sustainable basis. The school jointly administers the undergraduate Program in the Environment, and it offers master's and doctoral programs in ecological, social, and design sciences.

School of Music, Theatre & Dance

Consistently ranked among the top performing arts schools in the nation, and one of the oldest, the School of Music, Theatre & Dance is committed to creating an environment of educational and artistic excellence, nurturing creativity, academic integrity, and professionalism in its students and faculty. With degrees offered at the bachelor's, master's, and doctoral levels, the School is deeply engaged in the creation, practice, scholarship, and pedagogy of music, theatre, and dance. It fosters a spirit of social responsibility and principled entrepreneurship, and serves the community and state of Michigan through public performances, cultural resources, arts education, and outreach programs.

School of Nursing

The School of Nursing has held an unsurpassed reputation of excellence for more than 100 years. It has been a national leader in the advancement of nursing knowledge and the promotion of new trends in health care. The School's baccalaureate programs include a four-year B.S.N. program, a second career nursing program, and an R.N.-B.S.N. completion program. At the master's level, the School of Nursing, through the Horace H. Rackham School of Graduate Studies, offers advanced study in clinical specialist, nurse practitioner, and management roles. The school's prestigious Ph.D. and postdoctoral programs prepare nurse scientists to develop the knowledge necessary to support and advance nursing practice.

School of Public Health

The history of the School of Public Health dates back to 1881, when the first course in sanitary science was taught in the College of Literature, Science, and the Arts. Established in 1941, the school has awarded master of public health, master of science, master of health services administration, and doctor of public health degrees to more than 13,000 students. Doctor of philosophy programs were established in 1947 and now include concentrations in biostatistics, environmental health sciences, epidemiology, health behavior and health education, and health management and policy. Key areas of research include vaccine development, air and water quality, reproductive and women's health, and health care costs, quality, and access.

School of Social Work

The program in social work began in 1921, and was granted the status of a school in 1951. Faculty maintain high research productivity while teaching an innovative curriculum. At the master's level, the school prepares professional practitioners for work with individuals, children and their families, the aged, organizations, and communities. Students may focus their studies in the fields of substance abuse, mental health, education, child welfare, program evaluation, and public policy. The joint doctoral program in social work and social science is one of a kind and prepares students for academic and research careers. Graduates of both programs are found in leadership positions around the world. The School of Social Work consistently ranks as one of the best in the nation.

School of Information

A formal program began in 1926, when the Department of Library Science was created in the College of Literature, Science, and the Arts. In 1948, offerings became entirely graduate and a doctoral program was inaugurated. Establishment of an independent school, committed to the interdisciplinary study of information and library principles, came in 1969. In response to the rapid change brought on by present technology, the school broadened significantly further in the 1990s. It now pursues a highly interdisciplinary approach to educate professionals who will serve as leaders in the information age. Recognizing this broader mission, the school was renamed the School of Information in 1996.

**Penny W. Stamps
School of Art & Design**

The Penny W. Stamps School of Art & Design traces its history at the University to visual arts education in the late 19th century, awarding its first degree in 1960, and becoming a University of Michigan school in 1974. In 2002, the school launched a unique curriculum that prompted the National Association of Schools of Art and Design to report, "The School of Art & Design and the University of Michigan have created an opportunity to lead the academic conversation in art and design in this country." The school prepares graduates for a broad range of creative professions through its undergraduate and graduate programs. Commitment to the integration of art and design, community engagement, international experience, connections to the academic resources of the University, interdisciplinary pursuit, and public presentation of creative work are required of all majors.

School of Kinesiology

Kinesiology has been part of the University of Michigan curriculum since the turn of the 20th century and joined the ranks for the schools and colleges as an independent unit in 1984. Concentrations have the common thread of human movement and span a wide range including movement science, physical education, sport management, and athletic training. Kinesiology prepares undergraduates for careers as diverse as medicine and physical therapy to athletic administration, marketing, and law. Master's and doctoral students expand their opportunities in higher education, research, health care, public health or medicine, business, and law.

**Gerald R. Ford School of
Public Policy**

The School of Public Policy prepares graduates for distinguished careers in policy analysis and management, and promotes improved public policy through research. Its curriculum combines rigorous grounding in contemporary social science, opportunities to develop expertise in a variety of policy domains, and practical experience. Graduates work in government and the private and nonprofit sectors, using their knowledge, judgment, and new ideas to solve social problems, both domestic and international. The school traces its history to the Institute of Public Administration, established in 1914 as one of the first programs in municipal administration in the United States. In 1999, the regents approved the naming of the school in honor of Gerald R. Ford, the 38th President of the United States and a 1935 graduate of the University.

CANDIDATES FOR DEGREES AND CERTIFICATES

The following is a list of the candidates for degrees to be granted upon completion of formal requirements. A candidate is listed alphabetically by degree, and in some cases also by field of specialization, under the school or college which awards the degree. In this program, candidates are presented in the order of which their respective schools or colleges were founded.

The Executive Board of the Horace H. Rackham School of Graduate Studies awards doctoral, master's, and some graduate professional degrees (e.g., master of public policy, master of urban planning), although most graduate professional degrees, such as doctor of medicine, master of social work, etc., are awarded by the respective schools or colleges. The Graduate School does not offer course work, and advanced studies are conducted within the school or college of a candidate's area of specialization.

This program presents as complete and accurate a record of candidates for degrees as is possible as of the publication date.

HORACE H. RACKHAM SCHOOL OF GRADUATE STUDIES

Founded in 1912, Carol A. Fierke, Dean and Vice Provost for Academic Affairs–Graduate Studies

Candidates for degrees granted April 29, 2016

Doctor of Musical Arts

Arianne Guingona Abela, Field of Specialization: Conducting (Choral).

Melisse Brunet, Field of Specialization: Conducting (Orchestral).

Martha A. Guth, Field of Specialization: Music Performance.

Hyo Rim Han, Field of Specialization: Music Performance.

Caroline Nicole Steiger, Field of Specialization: Music Performance.

Doctor of Philosophy

Sarah Miranda Aarons, Field of Specialization: Geology. Dissertation: Evidence of Regional and Global Climate Change in the Mineral Aerosol (Dust) Record from Ice Cores Through the Anthropocene and Pleistocene.

Nassim Abdul Samad, Field of Specialization: Mechanical Engineering. Dissertation: Improved Battery State Estimation Using Novel Sensing Techniques.

April Adams, Field of Specialization: Cancer Biology. Dissertation: Targeting Cancer Stem Cells in Mucoepidermoid Carcinoma.

Luciana Mihaela Aenasoaie, Field of Specialization: Anthropology and History. Dissertation: Weaving and Unraveling the Factory Town: Social Alterations and European Belonging in the Aftermath of Romanian Industrial Collapse.

Fuzuli Agri Akcay, Field of Specialization: Naval Architecture and Marine Engineering. Dissertation: Prediction, Analysis, and Measurement of Ductile Fracture of Metals.

Ismail Fajrie Alatas, Field of Specialization: Anthropology and History. Dissertation: Aligning the *Summa* and the *Jamā'a*: Religious Authority and Islamic Social Formation in Contemporary Central Java, Indonesia.

Kristin Smith Alvarez, Field of Specialization: Educational Studies. Dissertation: Feedback for Teacher Learning and the Improvement of Instruction: Conceptualization, Preparation, and Practice.

Jojo Anamuah Amonoo, Field of Specialization: Applied Physics. Dissertation: Optimizing Energy Conversion in Organic Materials via Processing and Morphological Design.

Katherine R. Avery, Field of Specialization: Mechanical Engineering. Dissertation: A Predictive Framework for Thermomechanical Fatigue Life of High Silicon Molybdenum Ductile Cast Iron Based on Considerations of Strain Energy Dissipation.

Joshua Azevedo, Field of Specialization: Neuroscience. Dissertation: Anterior Cingulate MicroRNA Expression Differences in Mood Disorder Patients: Contrasts with Transcriptomic Analyses in an Animal Model of Depression.

Brittany Agius Bailey, Field of Specialization: Pharmaceutical Sciences. Dissertation: Development and Characterization of Novel Self-Encapsulating Poly(lactic-co-glycolic acid) Microspheres for Vaccine Delivery.

John Ira Bailey III, Field of Specialization: Astronomy and Astrophysics. Dissertation: Multiplexed High-Precision Radial Velocities: Searching for Hot Jupiters in Southern Open Star Clusters.

Suyoung Bang, Field of Specialization: Electrical Engineering. Dissertation: Circuit Techniques for Power Management Unit and Switched Capacitor DC-DC Converter.

Mattia Beghelli, Field of Specialization: Romance Languages and Literatures Italian. Dissertation: As Seen on TV: Programming Cinema and Entertainment in Italy in the Long 1980s.

Barry James Belmont, Field of Specialization: Biomedical Engineering. Dissertation: Multimodal Non-Invasive Hemodynamic Monitoring.

Aaron Matthew Bender, Field of Specialization: Medicinal Chemistry. Dissertation: Synthesis and Evaluation of Mixed Efficacy Mu Opioid Receptor (MOR), Delta Opioid Receptor (DOR) Peptidomimetic Ligands.

Christoph E. Boehm, Field of Specialization: Economics. Dissertation: Essays on Business Cycles and Stabilization Policy.

Jose Henrique Bortoluci, Field of Specialization: Sociology. Dissertation: Architectures of the People: Material and Cultural Politics of Housing in Sao Paulo, 1950–1995.

Monique Mignon Bourdage, Field of Specialization: Communication. Dissertation: Beyond the Centerfold: Masculinity, Technology, and Culture in Playboy's Multimedia Empire, 1953–1972.

Mark Mitchell Bourne, Field of Specialization: Nuclear Engineering and Radiological Sciences. Dissertation: Organic Scintillators in Nonproliferation Applications With a Hybridized Double-Pulse Rejection Technique.

Lashonda Marie Brenson, Field of Specialization: Political Science. Dissertation: Where's the Caucus? A Study of Minority Agenda Setting Behavior.

Elaina Breznau, Field of Specialization: Cellular and Molecular Biology. Dissertation: Regulation of Epithelial Cytokinesis and Cell-Cell Junctions by MgcRacGAP.

Elizabeth Stephenie Brown, Field of Specialization: Chemistry. Dissertation: Organic Reactions of Gallium Phosphide and Silicon Surfaces for Stability and Dye Sensitization.

Hatim Adnan Bukhari, Field of Specialization: Electrical Engineering. Dissertation: Antenna Bandwidth and Radiation Control by Topology and use of Non-Conductive Materials.

- Ibrahim Malek Oraiqat**, Field of Specialization: Applied Physics. Dissertation: Ultrafast Pulsed-Laser Applications for Semiconductor Thin Film Deposition and Graphite Photoexfoliation.
- Yi Ouyang**, Field of Specialization: Electrical Engineering-Systems. Dissertation: On the Interaction of Information and Decisions in Dynamic Networked Systems.
- Dave Wilson Oyler**, Field of Specialization: Aerospace Engineering. Dissertation: Contributions To Pursuit-Evasion Game Theory.
- Paul Ozog**, Field of Specialization: Electrical Engineering-Systems. Dissertation: Advances in Simultaneous Localization and Mapping in Confined Underwater Environments Using Sonar and Optical Imaging.
- Pinaki Pal**, Field of Specialization: Mechanical Engineering. Dissertation: Computational Modeling and Analysis of Low Temperature Combustion Regimes for Advanced Engine Applications.
- Nitya Pandalai Nayar**, Field of Specialization: Economics. Dissertation: Essays on Multinationals and International Spillovers.
- Ashwin Panday**, Field of Specialization: Macromolecular Science and Engineering. Dissertation: Electrostatic Confinement, Patterning, and Manipulation of Charged Nanoparticles by Combining Nanostructured Surfaces and Ionic Charge Regulation.
- Gina J. Park**, Field of Specialization: Education and Psychology. Dissertation: Exploring Teachers' Knowledge and Beliefs About the Value of Psychological Knowledge for Teaching.
- Jong Jin Park**, Field of Specialization: Mechanical Engineering. Dissertation: Graceful Navigation for Mobile Robots in Dynamic and Uncertain Environments.
- Angy Patricia Perez Martinez**, Field of Specialization: Epidemiological Science. Dissertation: Trends and Surveillance of Adult Pneumococcal Diseases in Arkansas State, 2000 to 2013.
- Joshua Glenn Petrie**, Field of Specialization: Epidemiological Science. Dissertation: Vaccine Induced Protection Against Influenza: Persistence of Serum Antibodies, Vaccine Efficacy as a Function of Time, and Use of Transmission Models to Estimate Vaccine Effectiveness in Household Cohort Studies.
- Karthik Pisupati**, Field of Specialization: Pharmaceutical Sciences. Dissertation: Stability and Structural Analysis of hGH and Infliximab for Controlled Release Depots and Biosimilars.
- Amit Pithadia**, Field of Specialization: Chemistry. Dissertation: Using Small Molecules and Peptides as Chemical Tools to Study Metal-Amyloid, Membrane-Amyloid, and Peptide-Amyloid Interactions.
- Alexis Pierre Valere Poitrasson-Riviere**, Field of Specialization: Nuclear Engineering and Radiological Sciences. Dissertation: Development of a Dual-Particle Imaging System for Nonproliferation Applications.
- Lindsay Regina Pool**, Field of Specialization: Epidemiological Science. Dissertation: The Health Consequences of Negative Wealth Shock During Late Middle Age.
- Matthew Anthony Prelee**, Field of Specialization: Electrical Engineering-Systems. Dissertation: Manhattan Cutset Sampling and Sensor Networks.
- Tanaz Rahimzadeh**, Field of Specialization: Mechanical Engineering. Dissertation: Design of Protective Structures for Optimal Blast and Impact Mitigation.
- Sudha Rajderkar**, Field of Specialization: Oral Health Sciences. Dissertation: Regulatory Role of Trim33 in Morphogenesis: A Paradigm for Common Human Congenital Defects.
- Janani Ramaswamy**, Field of Specialization: Biomedical Engineering. Dissertation: Management of Pathological Calcification Using Phosphorylated Apatite-specific Peptide Sequences.
- Pradeep Ranganathan**, Field of Specialization: Computer Science and Engineering. Dissertation: Non-parametric Models of Distortion in Imaging Systems.
- David Matthew Reed**, Field of Specialization: Electrical Engineering-Systems. Dissertation: Identification and Adaptive Control for High-performance AC Drive Systems.
- Hang Ren**, Field of Specialization: Chemistry. Dissertation: Electrochemically Modulated Generation/Delivery of Nitric Oxide (NO) from Nitrite for Biomedical Applications.
- Yangsuo Ren**, Field of Specialization: Human Genetics. Dissertation: Multi-Omics Analysis of a Rat Model of Aerobic Exercise Capacity and Metabolic Fitness.
- Elizabeth Marie Rhodes**, Field of Specialization: Social Work and Political Science. Dissertation: The Micro-Dynamics of Health and Education Provision in the Slums of Nairobi.
- Jenny Ro**, Field of Specialization: Cellular and Molecular Biology. Dissertation: Identification of Neurosensory Systems for Nutrient Evaluation and Their Regulatory Roles on Physiology and Lifespan.
- Rachael Marie Roettenbacher**, Field of Specialization: Astronomy and Astrophysics. Dissertation: Shifting the Starspot Paradigm through Imaging Magnetic Structures and Evolution.

Doctor of Philosophy

- Leela Ruckthong**, Field of Specialization: Biophysics. Dissertation: Crystallographic Comparison of Tris-Thiolate Sites in Designed Proteins to Control Metal Geometries.
- Garrett Adrian Ryan**, Field of Specialization: Greek and Roman History. Dissertation: Placing Power: Greek Cities and Roman Governors in Western Asia Minor, 69–235 CE.
- Phillip A. Saccone**, Field of Specialization: Pharmacology. Dissertation: Strategies to Improve Opioid Analgesia: Nociceptin Receptor Agonists and Intranasal Delivery in Monkeys.
- Jax Renee Sanders**, Field of Specialization: Physics. Dissertation: Advanced Gravitational Wave Detectors and Detection: Arm Length Stabilization and Directed Searches for Isolated Neutron Stars.
- Ellen Marie Schmidt**, Field of Specialization: Bioinformatics. Dissertation: Insights into the Genetic Architecture Underlying Plasma Lipids and Related Phenotypes from Genome-wide Human Genetic Variation.
- Aaron Sciore**, Field of Specialization: Chemistry. Dissertation: A General, Symmetry-Based Approach for the Assembly of Proteins into Nanoscale Polyhedra.
- Candice Latrice Scott**, Field of Specialization: Linguistics. Dissertation: Tense & Aspect Markers in African American English.
- Lotus Seeley**, Field of Specialization: Women's Studies and Sociology. Dissertation: Repairing Computers and (Re)producing Hierarchy: An Ethnography of Support Work and Status.
- Daniel Lewis Shafer**, Field of Specialization: Physics. Dissertation: Sharpening Our Observational Tools to Nail Down the Nature of Dark Energy.
- Joshua Daniel Shake**, Field of Specialization: Urban and Regional Planning. Dissertation: Privatizing Urban Planning and the Struggle for Inclusive Urban Development: New Redevelopment Forms and Participatory Planning in São Paulo.
- Chenhui Shao**, Field of Specialization: Mechanical Engineering. Dissertation: Data-Based Spatial and Temporal Modeling for Surface Variation Monitoring in Manufacturing.
- Terry Shyu**, Field of Specialization: Materials Science and Engineering. Dissertation: Engineering Responsive, Tunable, and Multifunctional Composites.
- Abhayendra Narayan Singh**, Field of Specialization: Computer Science and Engineering. Dissertation: A Safety-First Approach to Memory Models.
- David Jon Skoog**, Field of Specialization: Biomedical Engineering. Dissertation: Development and Evaluation of Extracorporeal Gas Exchangers for Multi-Function Use in Respiratory Failure.
- Sharan Srinivasan**, Field of Specialization: Chemical Biology. Dissertation: Heat Shock Protein 70 (Hsp70) Acts as a Guardian Against Multiple Cell Death Pathways.
- Lauren Beth Stadler**, Field of Specialization: Environmental Engineering. Dissertation: Elucidating the Impact of Low Dissolved Oxygen Wastewater Treatment on Pharmaceutical Fate.
- Nils-Hennes Stear**, Field of Specialization: Philosophy. Dissertation: Problems to Appreciate: Aesthetics, Ethics, and the Imagination.
- Aaron Lievret-Farchaus Stein**, Field of Specialization: Electrical Engineering-Systems. Dissertation: The Design and Effect Power Electronics on Vibration-Based Energy Harvesting Methods.
- Kale Jennings Stephenson**, Field of Specialization: Materials Science and Engineering. Dissertation: The Role of Dislocation Channeling in IASCC Initiation of Neutron Irradiated Austenitic Stainless Steel.
- Gabriella Rose Sterne**, Field of Specialization: Neuroscience. Dissertation: Signaling Mechanisms of Down Syndrome Cell Adhesion Molecule in Presynaptic Arbor Size Control.
- Matthew Brossard Stone**, Field of Specialization: Biophysics. Dissertation: Investigation of Membrane Domains around the B Cell Receptor using Super-Resolution Microscopy.
- Zohar Maia-Aliya Strinka**, Field of Specialization: Industrial and Operations Engineering. Dissertation: Supplier Choice: Market Selection under Uncertainty.
- Steven Michael Sturlis**, Field of Specialization: Chemistry. Dissertation: Targeting the Activator Interaction Domain of Mediator Subunit Med25.
- Amy Sutton**, Field of Specialization: Molecular and Integrative Physiology. Dissertation: Dissecting Paraventricular Hypothalamic Neural Circuits Involved in Energy Balance Control.
- Adnan Khawaja Syed**, Field of Specialization: Molecular, Cellular and Developmental Biology. Dissertation: Factors that Influence Colonization with *Staphylococcus aureus*: The Role of Triclosan, the Immune Response, and Polymicrobial interactions.
- Clay Richard Tabor**, Field of Specialization: Geology. Dissertation: From Greenhouse to Icehouse: Understanding Earth's Climate Extremes Through Models and Proxies.
- Yifeng Tang**, Field of Specialization: Mechanical Engineering. Dissertation: A Nested-LES Approach for Computation of High-Reynolds Number, Equilibrium and Non-Equilibrium Turbulent Wall-Bounded Flows.
- Edgar Curtis Taylor**, Field of Specialization: Anthropology and History. Dissertation: Asians and Africans in Ugandan Urban Life, 1959–1972.
- Erin Taylor**, Field of Specialization: Biological Chemistry. Dissertation: Mechanistic Studies of Alkylation Repair DNA Glycosylases.
- Bram Ludovicus Henricus ten Berge**, Field of Specialization: Classical Studies. Dissertation: Tacitus on Principate and Empire: from the *Agricola* to the *Annales*.

Doctor of Philosophy

- Chu-Hsiang Teng**, Field of Specialization: Electrical Engineering. Dissertation: Strain Engineering of InGaN/GaN Nanopillars for Optoelectronic Applications.
- Alan Salvador Teran**, Field of Specialization: Electrical Engineering. Dissertation: Spectrum-Dependent Photovoltaic Energy Harvesting.
- Kart Tomberg**, Field of Specialization: Human Genetics. Dissertation: Identification of Thrombosis Modifier Genes Using ENU Mutagenesis in the Mouse.
- Alexis Chanel Trahan**, Field of Specialization: Nuclear Engineering and Radiological Sciences. Dissertation: Utilization of the Differential Die-Away Self-Interrogation Technique for Characterization and Verification of Spent Nuclear Fuel.
- Kuei-Nin Tseng**, Field of Specialization: Chemistry. Dissertation: Structure and Reactivity Studies of Bis(pyridylimino)isoindolate Transition Metal Complexes.
- Chih-Chiang Tsou**, Field of Specialization: Bioinformatics. Dissertation: Computational Framework for Data-Independent Acquisition Proteomics.
- Sriram Vaidyanathan**, Field of Specialization: Biomedical Engineering. Dissertation: Disruption of Endosomal Membrane by Cationic Vectors Drives Endosomal Release and Enables Successful Gene Delivery.
- Chris Valdez**, Field of Specialization: Neuroscience. Dissertation: A GAP in Form and Function: The Rac-GAP Alpha2-Chimaerin Regulates Dendrite Morphogenesis and Synaptic Plasticity.
- Timothy Blair Van Cleve**, Field of Specialization: Chemical Engineering. Dissertation: Development of Cathodic Electrocatalysts for Low Temperature H₂ Fuel Cell Applications: Improving Oxygen Reduction Activity through the Manipulation of Size, Shape, and Composition.
- Gulin Vardar**, Field of Specialization: Materials Science and Engineering. Dissertation: Rechargeable Magnesium/Oxygen Batteries: Reaction Mechanisms and Their Dependence on Electrolyte Composition.
- Jorge Javier Varela Torres**, Field of Specialization: Education and Psychology. Dissertation: School Variables as a Protective Factor for Violent Behavior.
- Ivan Vargas**, Field of Specialization: Psychology. Dissertation: Investigating the Effect of Sleep Deprivation on Hypothalamic-Pituitary-Adrenal-Axis Functioning and Attentional Biases to Emotional Information: An Experimental Study.
- Elaine Wah**, Field of Specialization: Computer Science and Engineering. Dissertation: Computational Models of Algorithmic Trading in Financial Markets.
- Jenna Cherie Walrath**, Field of Specialization: Physics. Dissertation: Probing the Band Structure and Local Electronic Properties of Low-dimensional Semiconductor Structures.
- Daniel John Walter**, Field of Specialization: Nuclear Engineering and Radiological Sciences. Dissertation: A High Fidelity Multiphysics Framework for Modeling CRUD Deposition on PWR Fuel Rods.
- Yichun Wang**, Field of Specialization: Biomedical Engineering. Dissertation: Three Dimensional Cell Culture: A Window into Transport of Nanomedicine in Tumor Tissue.
- Bonnie Marilyn Washick**, Field of Specialization: Political Science. Dissertation: Strange Spaces & Stranger Sensibilities: Feminist Counter-Publicity in the Digital Age.
- Michael Joseph Waters**, Field of Specialization: Materials Science and Engineering. Dissertation: Exploring Interfacial Phenomena in Photovoltaic Materials Structures Using First-Principles Calculations and Beyond.
- Amanda B. Wehner**, Field of Specialization: Neuroscience. Dissertation: The p75 Neurotrophin Receptor Augments Survival Signaling in the Striatum of Presymptomatic Q175^{WT/HD} Mice, an Animal Model of Huntington's Disease.
- Leah Gayle Weinberg**, Field of Specialization: Music: Musicology. Dissertation: Opera behind the Myth: An Archival Examination of *Einstein on the Beach*.
- Aaron Michael White**, Field of Specialization: Chemistry. Dissertation: Investigating Electrostatics and Dynamics in Confinement and Constructs Using Two-Dimensional Infrared Spectroscopy and Molecular Simulations.
- Brian Whitener**, Field of Specialization: Romance Languages and Literatures Spanish. Dissertation: The Rise of Finance: Cultural Production and Politics in Mexico and Brazil after 1982.
- Sungjin Wi**, Field of Specialization: Mechanical Engineering. Dissertation: Advanced Nanofabrication Technologies for Making Photo-Response Devices Based on Emerging Layered Transition Metal Dichalcogenides.
- Bradley Lawrence Wing**, Field of Specialization: Materials Science and Engineering. Dissertation: Residual Stresses and Oxidation of Silicon Carbide Fiber Reinforced Silicon Carbide Composites.
- Ian Zacharia Winkelstern**, Field of Specialization: Earth and Environmental Sciences. Dissertation: Diagenetic and Mineralogical Effects in Clumped Isotope Thermometry and Application to Last Interglacial Climate.
- Alexander Keith Wolf**, Field of Specialization: Chemistry. Dissertation: Strategies for Enhancing the Analytical Performance and Biocompatibility of Intravascular Amperometric Glucose Sensors.
- Jiangfeng Wu**, Field of Specialization: Electrical Engineering. Dissertation: Radar Sub-surface Sensing for Mapping the Extent of Hydraulic Fractures and for Monitoring Lake Ice and Design of Some Novel Antennas.
- Eric Wustrow**, Field of Specialization: Computer Science and Engineering. Dissertation: Security Hazards when Law is Code.

Hail to the col-ors that float in the light; Hur-rah for the Yel-low and Blue!

Dear Graduate:

On behalf of the Alumni Association of the University of Michigan, congratulations on your momentous achievement.

You may be leaving the University of Michigan, but the ties that bind alumni—across the miles and the years—are strong and enduring. Whether you are on the other side of the country or the other side of the world, you are part of something greater than yourself. You are now part of a community of more than 570,000+ Michigan alumni in 180 countries across the globe.

The Alumni Association is your connection to U-M. As a graduation gift, we give you a complimentary one-year membership to help you maintain the bonds you've created over the course of your time on campus. Use it to remind yourself of the place that you hail from, the place that has shaped you into the person you are today. Visit umalumni.com to keep the spirit of U-M close and connect to the powerful global network of U-M alumni.

So as you toss your mortarboard and venture out into the world, celebrate all that you have achieved and remember that you are never far from the University of Michigan.

Again, our congratulations and very best wishes for your future.

Sincerely,

Ralph Johnson, MBA '92
