

Honoring the Class of 2021

UNIVERSITY OF MICHIGAN

*Spring
Commencement*

MAY 1, 2021

*Honoring the
Class of 2021*

SPRING COMMENCEMENT UNIVERSITY OF MICHIGAN

May 1, 2021

This book includes a list of the candidates for degrees to be granted upon completion of formal requirements. Candidates for graduate degrees are recommended jointly by the Executive Board of the Horace H. Rackham School of Graduate Studies and the faculty of the school or college awarding the degree. Following the School of Graduate Studies, schools are listed in order of their founding. Candidates within those schools are listed by degree then by specialization, if applicable.

| | |
|--|-----|
| Horace H. Rackham School of Graduate Studies | 23 |
| College of Literature, Science, and the Arts..... | 32 |
| Medical School | 53 |
| Law School | 55 |
| School of Dentistry | 57 |
| College of Pharmacy | 58 |
| College of Engineering | 59 |
| A. Alfred Taubman College of Architecture and Urban Planning | 72 |
| School of Education | 74 |
| Stephen M. Ross School of Business..... | 75 |
| School for Environment and Sustainability | 83 |

| School of Nursing | 88 |
| School of Public Health | 89 |
| School of Social Work | 92 |
| University of Michigan-Flint | 93 |
| University of Michigan-Dearborn..... | 100 |
| School of Information | 109 |
| Penny W. Stamps School of Art & Design..... | 111 |
| School of Kinesiology..... | 112 |
| Gerald R. Ford School of Public Policy..... | 114 |

A preliminary list of August 2021 degree candidates begins on page 117.

This book presents as complete and accurate a record of candidates for degrees as is possible as of the publication date.

LETTER FROM THE PRESIDENT

Dear Graduates,

Class of 2021, you did it!

On behalf of the Board of Regents and everyone at U-M, congratulations!

Your final semesters included unexpected difficulty, as you were forced to cross the finish line to graduation during a global pandemic. You persevered and succeeded nonetheless.

The COVID-19 pandemic has upended life throughout the United States and all around the world. But it has also revealed once again the need for educated, creative and talented people to lead and confront a challenge.

This includes all of you.

We have all seen the effects of the pandemic as they relate to medicine, public health, business, public policy and education. At the same time, other disciplines have engaged deeply and importantly, whether it is using technology to bring the arts to people while they shelter in their homes, or through examining the disparities in our society that are being exacerbated by this virus.

More than ever before, we need talented individuals in all disciplines to shape the uncertain future that the pandemic has thrust upon us.

I am deeply grateful that you, the University of Michigan Class of 2021, will rise to meet it.

Go Discover.
Go Achieve.
Go Serve.
And Go Blue!

Sincerely,

Mark S. Schlissel
President

ORDER OF EXERCISES

Honoring the Class of 2021

| Michael J. Solomon | <i>Dean, Horace H. Rackham School of Graduate Studies and Vice Provost for Academic Affairs–Graduate Studies</i> |
| Lynn Videka | <i>Dean, School of Social Work</i> |
| Mark D. West | <i>David A. Breach Dean of Law, Law School</i> |

HONORARY DEGREE RECIPIENT

Robert Cailliau

Doctor of Science

Computer engineer and University of Michigan alumnus Robert Cailliau is internationally recognized for envisioning information technology's potential to streamline data sharing, and for proposing the first hypertext system for the European Laboratory for Particle Physics (CERN, home of the Large Hadron Collider), an important step in developing the World Wide Web (WWW). Born in Tongeren, Belgium, he earned a degree in electrical and mechanical engineering (1969) from the University of Ghent. He also worked at the Ghent Laboratory of Mechanical Engineering, where he improved data collection techniques and introduced instruments that allowed results to be recorded digitally. After earning an M.S.E. degree in computer, information, and control engineering (1972) from U-M, he returned to Belgium, where he developed software for a hybrid computer. During his military service in the Belgian army, he maintained Fortran programs to simulate troop movements. After joining CERN in 1974, he made numerous contributions, including important developments in the particle accelerator's computer control systems and as leader of the office computing group in its Data Handling Division before joining the Electronics and Computing for Physics Division in 1989. Also in 1989, he proposed a hypertext system to facilitate access to CERN documents. He and Tim Berners-Lee co-authored a paper in 1990 describing the WWW global information system. He successfully worked with CERN's Legal Service and Directorate to release the web technology into the public domain in 1993, and organized the first International WWW Conference held at CERN in 1994. Subsequently, and through 2002, he served on the steering committee that organizes the annual international web conferences. In collaboration with the Fraunhofer-Gesellschaft, Mr. Cailliau launched the European Commission's first web-based project for information dissemination. Additionally, he worked with the European Commission on the Web for Schools project to promote the web as an educational resource. During the period from 1995 to 2000, he helped transfer web development from CERN to the World Wide Web Consortium. He also was a gracious host to U-M physicists working on the Large Hadron Collider. Mr. Cailliau retired from CERN in 2007. A respected public voice on web developments, he speaks authoritatively on the history and future of the web, including his concerns about unbridled social networking and the erosion of privacy. Among other honors, Mr. Cailliau and Mr. Berners-Lee, along with Marc Andreessen and Eric Bina (who developed Mosaic, forerunner to Netscape), received the Association for Computing Machinery Software System Award for developing the web. Mr. Cailliau is a member of the Internet Society Internet Hall of Fame and a recipient of the Flemish Academy of Sciences and the Arts Gold Medal, the Médaille Genève Reconnaisante, and several honorary degrees. By decree, Belgium's King Albert II in 2004 awarded him the title of Commander in the Order of King Leopold.

Mr. Cailliau, as an early and key contributor to web development, you anticipated how advances in information technology could propel scientific research and other collaborative ventures, make knowledge more accessible to wider audiences, and bring people together. Your commitment to public access to information and tenacity in building and sustaining a community to support web development have enabled explosive growth of the web, with enormous consequences for science, education, government, and politics. The University of Michigan is proud to present to you the honorary degree, Doctor of Science.

HONORARY DEGREE RECIPIENT

Janet Guthrie

Doctor of Laws

Race car driver and University of Michigan alumna Janet Guthrie made history in 1977 as the first woman to qualify for and start in the Daytona 500 and Indianapolis 500. Ms. Guthrie, a former aerospace engineer, pilot, and flight instructor, has shattered gender stereotypes and expanded opportunities for women in male-dominated fields. Born in Iowa City, Iowa, Ms. Guthrie grew up in Dade County, Florida, where she earned a pilot's license at age 17. After earning a B.S. degree in physics (1960), Ms. Guthrie worked as a research and development engineer at Republic Aviation. One of the few women working in the aerospace industry, she applied for the first National Aeronautics and Space Administration Scientist-Astronaut Program in 1964 and made it through the initial elimination round. Her racing career began with the purchase of a 1953 Jaguar XK120 M coupe; by 1963 she was racing her Jaguar XK 140 in Sports Car Club of America events. She built engines, did bodywork, and slept in the back of her tow car so she could afford car parts and race fees. In 1967 and 1970, she finished first in class at the Sebring 12-Hour International Manufacturers Championship race. She began racing full time in 1972. Her physics background provided the foundation to master racing at a time when women were considered incapable of safely driving high-performance race cars. An excellent driver, mechanic, engineer, and team manager, she gained the respect of A.J. Foyt and other top drivers. She earned a starting spot in the Indianapolis 500 in 1977, 1978, and 1979, but mechanical problems kept her from completing the races in 1977 and 1979. In 1978, she formed and managed her own team for Indianapolis, finishing ninth despite problems that included a fractured wrist. She was the first woman to compete in the Daytona 500, where she finished 12th in 1977 and 11th in 1980. Unable to secure corporate sponsorship, she drove her last big National Association for Stock Car Auto Racing event in 1980. The author of the popular book *Janet Guthrie: A Life at Full Throttle* (2005), she has given many public lectures and become a popular television personality, appearing on James Michener's *Sports in America* and *Good Morning America*. The ESPN 30 for 30 documentary series chronicled her racing career in *Qualified* (2019). She is a member of the International Women's Sports Hall of Fame, the International Motorsports Hall of Fame, the Sports Car Club of America Hall of Fame, and the Automotive Hall of Fame. In 2020 she was inducted into the National Motorsports Press Association Hall of Fame, the Sebring 12-Hour Hall of Fame, and the Indianapolis Motor Speedway Hall of Fame. Her helmet and race suit are in the Smithsonian, and her racing glove from the 1977 Indianapolis 500 is part of the Henry Ford collection.

Ms. Guthrie, you inspire us with your grit, courage, and accomplishments in the auto race industry and as a notable change agent in society. Your fortitude in the face of prejudice and indifference to gender stereotypes opened the racing world to future generations of women. By your example, you embolden girls and women to pursue and excel in their chosen fields, from engineering and science to professional sports. The University of Michigan is excited to present to you the honorary degree, Doctor of Laws.

HONORARY DEGREE RECIPIENT

Photo: Rog and Bee Walker for EJI

Bryan Stevenson

Doctor of Humane Letters

Bryan Stevenson, social justice activist, civil rights attorney, and founder and executive director of the Equal Justice Initiative (EJI), is one of our nation's most influential lawyers. He is a 1995 John D. and Catherine T. MacArthur Fellowship winner and author of the best-selling memoir *Just Mercy: A Story of Justice and Redemption* (2014). Born in Milton, Delaware, he earned a B.A. degree (1981) from Eastern University in Pennsylvania, an M.A. (1985) in public policy from Harvard University's John F. Kennedy School of Government, and a J.D. (1985) from the Harvard Law School. He worked at the Southern Center for Human Rights in Atlanta, Georgia, from 1985 to 1989, when he moved to Montgomery, Alabama. There, he launched the EJI, a nonprofit that represents people who have been illegally convicted, unfairly sentenced, or abused in jails and prisons. EJI has won reversals, relief, or release from prison for more than 135 prisoners on death row and hundreds of others wrongly convicted. Mr. Stevenson has won five U.S. Supreme Court cases, including a 2012 decision that found mandatory life sentences for minors unconstitutional, and a 2019 ruling protecting condemned prisoners who suffer from dementia. Mr. Stevenson has written extensively on criminal justice, capital punishment, and civil rights. His 2012 TED talk "We Need to Talk about An Injustice" has been viewed more than seven million times. He led efforts to build the National Memorial for Peace and Justice and the Legacy Museum: From Enslavement to Mass Incarceration. Both opened in Montgomery in 2018. Mr. Stevenson has been a visiting professor at U-M Law School and addressed the Gerald R. Ford School of Public Policy 2009 graduating class. This spring, the Ford School selected *Just Mercy*, winner of the Andrew Carnegie Medal for Excellence in Nonfiction and the Dayton Literary Peace Prize, for its all-school book read. The film *Just Mercy*, based on his memoir, was released in 2019. Mr. Stevenson, recipient of U-M's 2016-2017 Wallenberg Medal, said in his Wallenberg Lecture, "Your character and commitment to justice will be measured by how you treat the poor, the incarcerated, and the condemned." Mr. Stevenson is a member of the American Academy of Arts and Sciences and has received, among other honors, the Olaf Palme Prize, the Gruber Foundation International Justice Prize, the American Bar Association Thurgood Marshall Award, the Martin Luther King, Jr. Nonviolent Peace Prize from the King Center in Atlanta, and the National Association of Criminal Defense Lawyers Lifetime Achievement Award. He was named to the *Time* 100 Most Influential People list and the *Fortune* World's Greatest Leaders list. He is a law professor at New York University and serves on the boards of the Children's Defense Fund and Partners in Health, which seeks to bring quality health care to the world's most vulnerable.

Mr. Stevenson, we are inspired by your devotion to helping the poor and incarcerated. You have toppled unjust laws and advanced social justice by successfully challenging the death penalty and excessive punishment in the courts. You have expanded and reshaped our national narrative about race through your teaching and writing and by envisioning and erecting new historic landmarks. With gratitude for your unflinching determination to achieve a more inclusive and equitable society, the University of Michigan proudly presents to you the honorary degree, Doctor of Humane Letters.

HONORARY DEGREE RECIPIENT

Twyla Tharp

Doctor of Fine Arts

Renowned choreographer Twyla Tharp has thrilled audiences with her electrifying artistry for more than five decades. Ms. Tharp, founder of the Twyla Tharp Dance company and a recipient of the 1992 John D. and Catherine T. MacArthur Fellowship, works fluidly with multiple musical genres, from classical to jazz and pop. She is known for the originality and physicality of her dances, exacting standards, and relentless work ethic. Ms. Tharp, a longtime New York City resident, was born in Portland, Indiana, and grew up in Rialto, California. Gifted with absolute pitch, she began playing piano at age 4, earned a B.A. degree (1963) in art history from Barnard College, and studied with Merce Cunningham and Martha Graham. As a member of the Paul Taylor Dance Company, she performed in Rackham Auditorium under the auspices of the University Musical Society (UMS) in 1964. A year later, she launched her own company, which toured internationally from 1971 to 1988. Ms. Tharp choreographed *Deuce Coupe* (1973), the first modern dance/ballet crossover, to the music of the Beach Boys for the Joffrey Ballet, and *Push Comes to Shove* (1976), another crossover, for the American Ballet Theatre (ABT). In all, she has created more than 160 works, including dances, television specials, films, ballets, and Broadway shows. She won two Emmy Awards and the Directors Guild of America Award for the television special *Baryshnikov by Tharp* (1985). Ms. Tharp has created dances for leading companies, including the ABT, Australian Ballet, Martha Graham Dance Company, New York City Ballet, Paris Opera Ballet, and Britain's Royal Ballet. Her film credits for choreography include *Hair* (1978), *Amadeus* (1983), *White Nights* (1985), and *I'll Do Anything* (1994). She debuted on Broadway with *When We Were Very Young* (1980). Her musical *Movin' Out* (2002), set to the music and lyrics of Billy Joel, won a Tony Award for Best Choreography. Ms. Tharp returned to Ann Arbor with her company in 1996 for a six-day residency that included UMS performances, a film series, and educational events, and again in 2002 for performances and a lecture and demonstration by Ms. Tharp. Addressing the ephemeral nature of dance, she has created an archive of her teaching and performing tapes and maintains an online catalog of her work. Shortly after the COVID-19 pandemic began, Ms. Tharp started using Zoom to choreograph dances. She has authored four books, including her autobiography *Push Comes to Shove* (1992) and *Keep It Moving, Lessons for the Rest of Your Life* (2019). Ms. Tharp is a member of the American Academy of Arts and Sciences and the American Philosophical Society. She received a National Medal of Arts in 2004 and was a Kennedy Center Honoree in 2008. The Smithsonian National Portrait Gallery featured her in its critically acclaimed "Dancing the Dream" exhibition in 2013-2014.

Ms. Tharp, you are one of the world's most prolific choreographers, famous for the breadth of your work and a life-long passion for communicating and building community through dance. You developed a performance vocabulary that draws from many sources, and have created a distinctive, interpretive language for dance that inspires new generations of dancers. The University of Michigan is pleased to recognize your legendary contributions to dance and American culture, and to present to you the honorary degree, Doctor of Fine Arts.

HONORARY DEGREE RECIPIENT

James Toy

Doctor of Humane Letters

Human rights activist and University of Michigan alumnus James Toy has devoted his life to championing the rights of individuals and groups experiencing discrimination. A School of Social Work graduate (M.S.W. 1981), he cofounded the Detroit Gay Liberation Front and the Ann Arbor Gay Liberation Front (AAGLF), and created a safe space for members of U-M's lesbian, gay, bisexual, transgender, and queer (LGBTQ) community. Born in New York City, Mr. Toy grew up in Granville, Ohio, where his Asian American family was one of three families of color. He earned a B.A. degree in French and music (1951) at Denison University, taught in France, and worked at a hospital blood bank in New York City as a conscientious objector before moving to Detroit in 1957, where he was an organist and choirmaster at an Episcopal church. Mr. Toy publicly came out as gay, the first man in Michigan to do so, at an anti-Vietnam War rally in Detroit in April 1970. In response to a petition from the AAGLF, U-M opened the Human Sexuality Office (HSO) in 1971 and hired Mr. Toy as a human sexuality advocate. The HSO, later renamed the Spectrum Center, was the first on-campus office to support queer students at a higher education institution in the United States. As a human sexuality advocate, he educated the University community and others about the nature of sexuality, specifically homosexuality, the oppression that LGBTQ people endure, and LGBTQ rights. He also led the drive to update U-M's nondiscrimination bylaw. In 1993, University Regental Bylaw 14.06 was expanded to ban discrimination based on sexual orientation. Later, in 2007, gender identity and expression were added to U-M's nondiscrimination policy. Mr. Toy served in U-M's affirmative action office from 1994 until he retired in 2008. He continues to work as a community counselor and therapist, assisting individuals, couples, and groups to address concerns of gender identity, gender expression, and sexual orientation. Mr. Toy helped draft Ann Arbor's Lesbian-Gay Pride Week Proclamation and Human Rights Ordinance, one of the nation's first ordinances prohibiting discrimination based on sexual orientation. He also helped found the Ann Arbor Gay Hotline, the HIV/AIDS Resource Center of Washtenaw County, and the Washtenaw Rainbow Action Project. Mr. Toy served on the Michigan House of Representatives Civil Rights Committee Task Force on the Family and Sexuality, and helped develop the American Civil Liberties Union of Michigan Transgender Advocacy Project. In 2013, Ann Arbor Mayor Christopher Taylor proclaimed April 29, Mr. Toy's birthday, as Jim Toy Day. Washtenaw County's LGBTQ center is named the Jim Toy Community Center in his honor. He also has been recognized with the Michigan Lesbian and Gay Community Lifetime Achievement Award and the Spirit of Detroit Award.

Mr. Toy, throughout your life you have been a champion of justice and role model for all who wish to lead. Known for your moral clarity and gentle dignity, you have persistently worked to create an equitable society. Thanks to your vision and courage, LGBTQ students at U-M and institutions of higher learning across the country have access to resources, services, scholarships, and programs that celebrate their identities and honor their experiences. The University of Michigan is proud to recognize your many contributions and to confer upon you the honorary degree, Doctor of Humane Letters.

STUDENT SPEAKERS

Amanda Kaplan

Senior, Gerald R. Ford School of Public Policy

Amanda Kaplan of Sharon, Massachusetts, is passionate about democratic access and civic engagement. As student body president this past year, she represented all undergraduate, graduate, and professional students in discussions with University regents and administrators. She advocated for decreased police presence on campus, no school on election day, and, in response to COVID-19, flexible academic grading and mental health breaks. Active in Michigan Hillel, she supports Jewish advocacy through cross-cultural dialogue on social issues. She served on the U-M President's Advisory Committee on Labor Standards and Human Rights and the Ford School Dean's Advisory Committee on Election Year Activities. Amanda is graduating Phi Beta Kappa. She plans to move to Washington, D.C., and eventually attend law school. She hopes to work at the intersection of law and policy.

Arim Lee

Senior, College of Literature, Science, and the Arts

Arim Lee of Wheeling, Illinois, is committed to community building and helping others. As the elementary programming director for K-Grams, she works with Ann Arbor school administrators and teachers to ensure K-Grams' pen pal program and other outreach activities run smoothly. In 2020, K-Gram members corresponded with more than 200 elementary school students. Images of handwritten letters were exchanged via email. Arim learned about the importance of early childhood education as an undergraduate researcher at the Department of Psychology's Conceptual Development Lab. She has tutored elementary students in math and reading, and participated in community service projects through the local Harvest Mission Community Church. Recently admitted to the master's program at U-M's top-ranked School of Social Work, Arim plans to focus on the welfare of children and families pathway.

Rigoberto Vazquez Jr.

Master's of Science, College of Engineering

Rigoberto Vazquez of Newman, California, a Rackham Master's Merit Award Fellow and member of Alpha Nu Sigma National Honor Society, is a dedicated mentor and diversity champion. In addition to mentoring peers through College of Engineering and Engineering Student Government programs, he has worked as a student ambassador in the Department of Nuclear Engineering and Radiological Science to recruit a more diverse student body. He served as a graduate research assistant in biomedical engineering and learned firsthand about regenerative medicine and imaging procedures as a Michigan Medicine intern. Those experiences informed his master's thesis and two manuscript submissions. Cornell University has awarded him a doctoral fellowship to study biomedical engineering, beginning this fall. Ultimately, he would like to pursue a career in science policy, and politics.

UNIVERSITY FLAGS AND FLAG BEARERS

Each School and College has a unique flag, held by a student flag bearer at the opening of the commencement ceremony.

| | |
|--|-------------------|
| College of Literature, Science, and the Arts | Rafael Lopez |
| Medical School | Ali Hammoud |
| Law School | Patrick McDonell |

THE UNIVERSITY MACE

The University's mace is a symbol of academic scholarship, integrity, and authority. It is carried by the chair of the University Senate at the head of academic processions on such important ceremonial occasions as commencements, convocations, and inaugurations, representing the connection of all faculty members to important academic rituals. The mace being used today was given to the University in 1968 by the Senior Board, representing all the undergraduate schools and colleges. Crafted of red oak and trimmed with silver, the mace features the seals of the University and of the State of Michigan. Also engraved on the mace are the names of the University Presidents.

ACADEMIC COLORS

The colors of the various disciplines are as follows:

| | |
|---------------------------------|---------------------|
| Architecture and Urban Planning | <i>blue-violet</i> |
| Business Administration | <i>drab</i> |
| Dentistry | <i>lilac</i> |
| Education | <i>light blue</i> |
| Engineering | <i>orange</i> |
| Environment and Sustainability | <i>russet</i> |
| Fine Arts | <i>brown</i> |
| Information | <i>lemon</i> |
| Kinesiology | <i>sage green</i> |
| Law | <i>purple</i> |
| Literature and Arts | <i>white</i> |
| Medicine | <i>kelly green</i> |
| Music | <i>pink</i> |
| Nursing | <i>apricot</i> |
| Pharmacy | <i>olive green</i> |
| Philosophy | <i>dark blue</i> |
| Public Health | <i>salmon pink</i> |
| Public Policy | <i>peacock blue</i> |
| Science | <i>science gold</i> |
| Social Work | <i>citron</i> |

Mingled colors distinguish combined curriculums.

ACADEMIC DRESS AND CUSTOM

The colorful gowns and hoods worn by faculty members at commencement and other academic ceremonies represent the degrees, disciplines, and alma maters of the wearers. The American academic costume tradition, imported from England, dates to Colonial days.

Gowns

Bachelor's or master's degree gowns traditionally are black, as are many doctoral gowns in the United States. Some universities prescribe that their graduates wear gowns of another solid color such as blue, crimson, or green. Gowns differ in sleeve cut and trim. For example, the bachelor's gown has long, pointed sleeves while the master's gown has oblong sleeves. Doctoral gowns, with their distinctive bell-shaped sleeves, feature velvet panels down the front and around the neck, as well as crossbars of velvet on the sleeves. Colored trim denotes the field or discipline in which the degree was earned. Usually only a single degree from one institution is indicated by a garment. If more than one degree is held, the gown and hood of the higher or highest degree usually are worn.

Hoods

The hood most precisely describes the wearer's level of degree earned, the major field of learning, and the alma mater. The level of the degree held is indicated by the hood's shape and size and the width of its velvet or velveteen trimming. The bachelor's, master's, and doctor's hoods are 36 inches, 42 inches, and 48 inches long, respectively. The velvet trim is two, three, and five inches wide, with the narrowest being for the bachelor's hood and the widest for the doctor's hood. The color of trim on the hood, as on the gown, identifies the major field of learning in which the degree was awarded. The hood is lined with the official colors of the college or university conferring the degree.

Caps

Caps vary in style from the traditional black mortarboard to eight-, six-, and four-corner tams, and Elizabethan-style caps. The mortarboard may be of any appropriate material, such as cotton, poplin, rayon, or silk, to match the gown. Velvet is reserved for holders of doctorates.

SCHOOLS AND COLLEGES OF THE UNIVERSITY

The order of presentation is by the year of founding.

College of Literature, Science, and the Arts

The College of Literature, Science, and the Arts, founded in 1841, was the first duly constituted college of the University of Michigan. Today, with more than 15,000 undergraduate and 2,000 graduate students, LSA is the largest of the University's schools and colleges, and it is still the heart of the campus. Distinguished in the humanities since its earliest years, the college became preeminent in the natural sciences during the early 20th century and went on to become a world leader in social science research. The college has always been dedicated to providing a richly diverse liberal arts education that prepares students to lead fulfilling lives as responsible citizens within a wide range of professional careers.

Medical School

Since opening its doors in 1850, the Medical School has been a leader in medical education, patient care, and biomedical research. In addition to its professional doctor of medicine program, the Medical School offers master's and doctoral degrees in the basic medical sciences. The school established the nation's first university-owned and -operated teaching hospital and created the first departments of pharmacology and human genetics in the United States. It also played an important role in the development of the electrocardiogram and in the development of iodized salt as a goiter preventive. The Medical School was among the first major American medical schools to graduate women and African Americans; today there are more practicing M.D.s from the University of Michigan than from any other medical school in the United States.

Law School

Founded in 1859, the Law School awarded its first bachelor of laws degrees in 1860. In 1870, the school became the second in the nation to confer a law degree on an African American candidate and the first major law school to admit a woman. In 1871, one of the school's graduates became the first woman with a law degree to be admitted to the bar. A national law school from its earliest years, the school's graduates work in every state of the union and in more than 73 countries, in business, as practitioners and professors, as legislators and members of Congress, and as distinguished civil servants and members of the judiciary.

School of Dentistry

Established in 1875, the School of Dentistry first granted the professional degree, doctor of dental surgery, the following year. A national leader in the training of professional dentists and long active in oral and craniofacial research, the school offers the doctor of dental surgery, master's degrees, and graduate clinical programs in several dental specialties and general dentistry. A doctoral degree is offered in oral health sciences and in an interdepartmental program in biomaterials. The School of Dentistry also offers baccalaureate and master's programs in dental hygiene.

College of Pharmacy

Established as a department in 1868, Pharmacy became a college in 1876, the first in any university in the United States. Today, the college has an average annual enrollment of 260 doctor of pharmacy and 70 graduate students, and is consistently ranked among the top pharmacy schools in the nation. The college offers the doctor of pharmacy degree; baccalaureate programs in medicinal chemistry and pharmaceutical sciences; and doctor of philosophy programs in medicinal chemistry, pharmaceutical sciences, and social and administrative sciences. Major areas of research include the biological, chemical, clinical, genomic, economic, and social aspects of drugs and therapeutic agents.

College of Engineering

Instruction began with a class in civil engineering in 1854. Historically, the College of Engineering has been a leader in establishing departments in emerging fields, including metallurgical engineering, naval architecture and marine engineering, electrical engineering, chemical engineering, aeronautical engineering, nuclear engineering, and computer engineering. Today, the college and its 85,000 alumni provide leadership in various technologies, health care, business, and the sciences, improving the quality of people's lives around the world.

Horace H. Rackham School of Graduate Studies

The Horace H. Rackham School of Graduate Studies oversees and coordinates graduate education, bringing together graduate students and faculty from across the institution to experience and take full advantage of the University as a scholarly community. The University awarded its first master of arts degree in 1849, first master of science degree in 1859, and first doctor of philosophy degree in 1876. Organized as a department in 1892, the School of Graduate Studies became an autonomous unit in 1913. In 1935, a generous gift from Horace H. and Mary A. Rackham included the site and construction of the Rackham Building for graduate studies and a substantial endowment for carrying on graduate work and research.

A. Alfred Taubman College of Architecture and Urban Planning

Michigan offered its first courses in architecture in 1876. The program became a department in 1913, and by 1931, the College of Architecture was established as a separate entity. During the 1940s, the college was one of the few schools in the country to consider research a necessary part of architectural education, and in 1946 it became the first to introduce a graduate program in urban planning. The college offers master of architecture, master of urban planning, and master of urban design degrees; bachelor of science and master of science degrees in architecture; and doctoral programs in architecture and in urban and regional planning. In 1999, the college was named in honor of A. Alfred Taubman, founder and chairman of The Taubman Company, Inc., and a longtime friend, supporter, and adviser to the college.

School of Education

The School of Education was founded in 1921, 42 years after the University established the first chair in any United States collegiate institution devoted to the "science and art of teaching." The school prepares students for professional careers in teaching and administration, and offers advanced training for researchers and practitioners at all levels of education. Teacher diplomas were first offered in 1874; the first master's degree in education was conferred in 1891, the first Ph.D. in 1902, and the first Ed.D. in 1938.

Stephen M. Ross School of Business

Building on faculty and course offerings that began in the latter part of the 19th century, the school was formally established in 1924. Today, at all levels of instruction—bachelor's, master's, doctoral, and executive education—its programs rank in the top five among American institutions. Each year nearly 1,000 new School of Business graduates enter careers as business professionals and teacher-scholars, joining the approximately 37,000 who already serve in leadership positions in business, government, and academic institutions throughout the world.

School for Environment and Sustainability

The clear-cutting of Michigan's densely forested wilderness was well under way when the University of Michigan began offering courses in forestry in 1881—the first university in the United States to do so. The year 1903 saw the creation of a Department of Forestry, forerunner of today's School for Environment and Sustainability (SEAS). The school's students and faculty organized the famous 1970 Teach-In on the Environment (the prototype of Earth Day), and incubated the scholarly disciplines of Environmental Justice, Environmental Education, and Environmental Informatics. From its inception as a forestry school to the interdisciplinary institution it is today, SEAS has always prepared leaders to understand and solve the major environmental challenges of the era.

School of Music, Theatre & Dance

Consistently ranked among the top performing arts schools in the nation, and one of the oldest, the School of Music, Theatre & Dance is committed to creating an environment of educational and artistic excellence, nurturing creativity, academic integrity, and professionalism in its students and faculty. With degrees offered at the bachelor's, master's, and doctoral levels, the School is deeply engaged in the creation, practice, scholarship, and pedagogy of music, theatre, and dance. It fosters a spirit of social responsibility and principled entrepreneurship, and serves the community and State of Michigan through public performances, cultural resources, arts education, and outreach programs.

School of Nursing

The University of Michigan School of Nursing (UMSN) is an international leader in the advancement of nursing knowledge and strategies to improve health care. In addition to the four-year BSN program and the second career in nursing program, UMSN has a robust offering of graduate programs. Students are prepared to be leaders in advanced clinical practice through our M.S.N. and post-baccalaureate Doctorate of Nursing Practice (DNP) programs. Students can also lead and effect change through the M.S.N. or post-masters DNP programs in systems, populations, and leadership. UMSN's prestigious Ph.D. and postdoctoral programs prepare nurse scientists to develop the knowledge necessary to support and advance nursing practice.

School of Public Health

Founded in 1941 and ranked among the country's top public health schools, the University of Michigan School of Public Health educates more than 1,000 graduate and undergraduate students each year. With over 170 faculty and researchers across six departments and numerous collaborative centers and institutes, the school brings interdisciplinary, innovative solutions to complex health challenges, including chronic and infectious diseases, obesity and food insecurity, health care quality and cost, climate change and environmental factors, and socioeconomic inequalities and their impact on health. Compassion, innovation, and inclusion drive the faculty, staff, students, and 15,000 alumni of Michigan Public Health to pursue positive change and lasting impact on the health of the world.

School of Social Work

The program in social work began in 1921, and was granted the status of a school in 1951. Faculty maintain high research productivity while teaching an innovative curriculum. At the master's level, the school prepares professional practitioners for work with individuals, children and their families, the aged, organizations, and communities. Students may focus their studies in the fields of substance abuse, mental health, education, child welfare, program evaluation, and public policy. The joint doctoral program in social work and social science is one of a kind and prepares students for academic and research careers. Graduates of both programs are found in leadership positions around the world. The School of Social Work consistently ranks as one of the best in the nation.

School of Information

A formal program began in 1926, when the Department of Library Science was created in the College of Literature, Science, and the Arts. In 1948, offerings became entirely graduate and a doctoral program was inaugurated. Establishment of an independent school, committed to the interdisciplinary study of information and library principles, came in 1969. In response to the rapid change brought on by present technology, the school broadened significantly further in the 1990s. It now pursues a highly interdisciplinary approach to educate professionals who will serve as leaders in the information age. Recognizing this broader mission, the school was renamed the School of Information in 1996.

**Penny W. Stamps
School of Art & Design**

The Penny W. Stamps School of Art & Design traces its history at the University to visual arts education in the late 19th century, awarding its first degree in 1960, and becoming a University of Michigan school in 1974. In 2002, the school launched a unique curriculum that prompted the National Association of Schools of Art and Design to report, "The School of Art & Design and the University of Michigan have created an opportunity to lead the academic conversation in art and design in this country." The school prepares graduates for a broad range of creative professions through its undergraduate and graduate programs. Commitment to the integration of art and design, community engagement, international experience, connections to the academic resources of the University, interdisciplinary pursuit, and public presentation of creative work are required of all majors.

School of Kinesiology

Kinesiology has been part of the University of Michigan curriculum since the turn of the 20th century and joined the ranks for the schools and colleges as an independent unit in 1984. Concentrations have the common thread of human movement and span a wide range including movement science, physical education, sport management, and athletic training. Kinesiology prepares undergraduates for careers as diverse as medicine and physical therapy to athletic administration, marketing, and law. Master's and doctoral students expand their opportunities in higher education, research, health care, public health or medicine, business, and law.

**Gerald R. Ford School
of Public Policy**

The School of Public Policy prepares graduates for distinguished careers in policy analysis and management and promotes improved public policy through research. Its curriculum combines rigorous grounding in contemporary social science, opportunities to develop expertise in a variety of policy domains, and practical experience. Graduates work in government and the private and nonprofit sectors, using their knowledge, judgment, and new ideas to solve social problems, both domestic and international. The school traces its history to the Institute of Public Administration, established in 1914 as one of the first programs in municipal administration in the United States. In 1999, the regents approved the naming of the school in honor of Gerald R. Ford, the 38th President of the United States and a 1935 graduate of the University.

CANDIDATES FOR DEGREES AND CERTIFICATES

The following is a list of the candidates for degrees to be granted upon completion of formal requirements. A candidate is listed alphabetically by degree, and in some cases also by field of specialization, under the school or college that awards the degree. In this book, candidates are presented in the order of which their respective schools or colleges were founded.

The Executive Board of the Horace H. Rackham School of Graduate Studies awards doctoral, master's, and some graduate professional degrees (e.g., master of public policy, master of urban planning), although most graduate professional degrees, such as doctor of medicine, master of social work, etc., are awarded by the respective schools or colleges. The Graduate School does not offer course work, and advanced studies are conducted within the school or college of a candidate's area of specialization.

This book presents as complete and accurate a record of candidates for degrees as is possible as of the publication date.

HORACE H. RACKHAM SCHOOL OF GRADUATE STUDIES

Founded in 1912, Michael J. Solomon, Dean and Vice Provost for Academic Affairs–Graduate Studies

Candidates for degrees granted April 30, 2021

Doctor of Musical Arts

Jennifer Elizabeth Cresswell, Field of Specialization: Music Performance. Dissertation: Murder, She Sang: A Progression on Sopranos and Death.

Joseph Keith Kemper, Field of Specialization: Conducting (Choral). Dissertation: Three Portraits of Choral Repertoire: Evolutions of Choral Music, Frank Martin *Mass for Double Choir*, and Ted Hearne *Sound from the Bench*.

Sarah Mi-Eun Kim, Field of Specialization: Music Performance. Dissertation: Summary of Dissertation Recitals.

Xiaoya Liu, Field of Specialization: Music Performance. Dissertation: Summary of Three Dissertation Recitals.

Christine Elyse Lundahl, Field of Specialization: Conducting (Band). Dissertation: Wind Music Through the Ages: A Summary of Dissertation Recitals.

Joana Lenn Rusche, Field of Specialization: Music Performance. Dissertation: Summary of Dissertation Recitals: Notes on Three Performances.

Doctor of Philosophy

Ahmed Usama Said Said Abdelhady, Field of Specialization: Civil Engineering and Scientific Computing. Dissertation: Resilience of Residential Wooden Structures against Wind Hazards.

Abby Agi, Field of Specialization: Education and Psychology. Dissertation: What Does it Mean to be Black in North America? Interrogating Ethnic-Racial Identity in Context.

Ellen Yuleidy Aguilera, Field of Specialization: Chemistry. Dissertation: Development of Palladium-Mediated Transannular C—H Functionalization Methods for Alicyclic Amines.

Tutu T. Ajayi, Field of Specialization: Electrical and Computer Engineering. Dissertation: Rapid SoC Design: On Architectures, Methodologies and Frameworks.

Alaa Algargoosh, Field of Specialization: Architecture. Dissertation: Aural Architecture as Affect: Understanding the Impact of Acoustic Environments on Human Experience.

Fahad Hamad A. Alrashed, Field of Specialization: Linguistics. Dissertation: Investigation of the Distributions, Derivation, and Generalizations in Arabic Plural System.

Haley Minami Amemiya, Field of Specialization: Cellular and Molecular Biology. Dissertation: Functional and Mechanistic Characterization of Heterochromatin-like Domains in Bacteria.

Farah Ammous, Field of Specialization: Epidemiological Science. Dissertation: Effects of DNA Methylation on Cardiovascular Disease, Target Organ Damage, and their Risk Factors in African Americans.

Anna S. Antoniou, Field of Specialization: Anthropology. Dissertation: Collaborating for First Foods: Archaeological Investigations of Chinookan and Lower Chehalis Foodways in Willapa Bay, Washington.

Pahriya Ashrap, Field of Specialization: Environmental Health Sciences. Dissertation: Metal Exposure During Pregnancy: Trends, Predictors, Associations with Birth Outcomes and the Modifying Effect of Maternal Psychosocial Stress.

Javad Bagherzadeh, Field of Specialization: Computer Science and Engineering. Dissertation: A Holistic Solution for Reliability of 3D Parallel Systems.

Navid Barani Lonbani, Field of Specialization: Electrical Engineering. Dissertation: Small Electrical, Mechanical, and Biomechanical Systems of Electromagnetic Radiation.

Joel Mason Batterman, Field of Specialization: Urban and Regional Planning. Dissertation: A Metropolitan Dilemma: Regional Planning, Governance and Power in Detroit, 1945-1995.

Shanice Battle, Field of Specialization: Epidemiological Science. Dissertation: Power, Place and Mental Health: Pathways between Neighborhood Vulnerability and Depressive Symptoms.

Hannah Baumgartner, Field of Specialization: Psychology. Dissertation: Limbic Generators of Incentive Motivation and Aversive Motivation.

Marc Rudolf Becker, Field of Specialization: Chemistry. Dissertation: Development of New Methods Involving Strained Heterocycles.

Andrea Belgrade, Field of Specialization: Psychology. Dissertation: Advancing Multiculturalism in Positive Psychology: Cultivating Identity and Wellbeing from Seeds of Adversity.

Brian Arthur Bittner, Field of Specialization: Robotics. Dissertation: Data-Driven Methods for Geometric Systems.

Nicolas Boileau, Field of Specialization: Educational Studies. Dissertation: An Investigation of the Relationship Between Two Norms of the Instructional Situation of Geometric Calculation with Algebra in U.S. High School Geometry.

Ali Bolcakan, Field of Specialization: Comparative Literature. Dissertation: The Language of Politics, The Politics of Language: The Political Literature in the Late Ottoman Empire and the Early Turkish Republic.

Michael Booth, Field of Specialization: Health Behavior And Health Education. Dissertation: Cognitive Impairments in Immune-Mediated Inflammatory Diseases.

HORACE H. RACKHAM SCHOOL OF GRADUATE STUDIES

Doctor of Philosophy

- Alexandra Shelly Bova**, Field of Specialization: Neuroscience. Dissertation: Rodent Skilled Reaching: A Model for Investigating Neural Mechanisms of Dexterous Motor Control.
- Corin L. Bowen**, Field of Specialization: Aerospace Engineering. Dissertation: Thermomechanical Experiments and Modeling of Shape Memory Alloy Tension Springs; Critical and Liberative Analyses of Engineering Educational Systems.
- Irene Elsa Brisson**, Field of Specialization: Architecture. Dissertation: Speaking, Gesturing, Drawing, Building: Relational Techniques of a Kreyòl Architecture.
- Denis Luis Bueno**, Field of Specialization: Computer Science and Engineering. Dissertation: Software Model Checking with Uninterpreted Functions.
- Tucker Burgin**, Field of Specialization: Chemical Engineering. Dissertation: Transition Pathway Perspectives in Molecular Simulations of Enzymes.
- Zachary Thomas Butterfield**, Field of Specialization: Atmospheric, Oceanic and Space Sciences. Dissertation: A Multi-Scale Assessment of Solar-Induced Chlorophyll Fluorescence and Its Relation to Northern Hemisphere Forest Productivity.
- Lilian Edith Cabrera-Haro**, Field of Specialization: Psychology. Dissertation: Asymmetrical Learning of Win and Loss Associations: Individual Differences and Task Effects.
- Meredith Adelle Calogero**, Field of Specialization: Earth and Environmental Sciences. Dissertation: High-Resolution Numerical Thermal Modeling of Timescales and Mechanisms of Rhyolite Genesis and Transport as a Consequence of Basalt Influx: Applications to the Long Valley Volcanic Field, CA.
- Traci Lyn Carson**, Field of Specialization: Epidemiological Science. Dissertation: The Culture and Consequences of Low Energy Availability in National Collegiate Athletic Association Division One Female Distance Runners: A Mixed Methods Investigation.
- Amber Lee Cathey**, Field of Specialization: Environmental Health Sciences. Dissertation: Phthalate Exposures and Hormonal Disruption in Relation to Birth Outcomes.
- Rachel Cawkwell**, Field of Specialization: English Language and Literature. Dissertation: Prison Forms: Genre and Excarceral Politics in Victorian Literature.
- Yan-Cheng Chao**, Field of Specialization: Biostatistics. Dissertation: Estimation Methods and Clinical Trial Design in Small n, Sequential, Multiple-Assignment, Randomized Trials.
- Cole Alexander Chapman**, Field of Specialization: Chemistry. Dissertation: Clinical Diagnostics For Immune Response Assessment Through Multiplexed Biosensor Immunoassays In At-Risk Populations.
- Khalil Jimmy Chedid**, Field of Specialization: Epidemiological Science. Dissertation: Multidrug-Resistant Organisms: Preventing Acquisition and Transmission.
- Kuan-Hung Chen**, Field of Specialization: Materials Science and Engineering. Dissertation: Rational Design of Electrode Architectures for Improved Performance of Li-metal and Li-ion Batteries.
- Song Chen**, Field of Specialization: Pharmacology. Dissertation: Membrane Curvature During Cell Migration.
- Gilyoung Cheong**, Field of Specialization: Mathematics. Dissertation: Cycle Indices in Arithmetic Geometry.
- Wonjin Choi**, Field of Specialization: Materials Science and Engineering. Dissertation: Reconfigurable Kirigami Optics and Chiral Phonons.
- Kathleen Chou**, Field of Specialization: Materials Science and Engineering. Dissertation: Role of Oxygen on Phase Stability, Precipitation, Deformation, and Oxidation in Pure Titanium and Beta Titanium Alloys.
- Megan Connor**, Field of Specialization: Chemistry. Dissertation: Teaching and Learning 1H Nuclear Magnetic Resonance Spectroscopy.
- Jessica Leigh Cote**, Field of Specialization: Neuroscience. Dissertation: The Brain-Specific Alternatively Spliced Isoforms of Adapter Protein SH2B1 Regulate Energy Balance and Neuronal Morphology and Function.
- Evelyn Marie Covés-Datson**, Field of Specialization: Microbiology and Immunology. Dissertation: Molecularly Engineered Lectins as Anti-Influenza Agents.
- Emily Marie Crossette**, Field of Specialization: Environmental Engineering. Dissertation: Microbial Diversity and Antimicrobial Resistance in Land Applied Manure.
- Kathryn Irene Cunningham**, Field of Specialization: Information. Dissertation: Purpose-first Programming: A Programming Learning Approach for Learners Who Care Most About What Code Achieves.
- Christine R. Cuthbertson**, Field of Specialization: Medicinal Chemistry. Dissertation: Inhibition of Nucleotide and One-Carbon Metabolism for the Treatment of Cancer.
- Shiba Sundar Dandpat**, Field of Specialization: Chemistry. Dissertation: Mechanism of Transcription and Translation Regulation by Riboswitches in Bacteria.
- David Zhenzhong Dang**, Field of Specialization: Aerospace Engineering and Scientific Computing. Dissertation: Thermal and Structural Response Modeling of a Woven Thermal Protection System.
- Sampurna Datta Bhattacharya**, Field of Specialization: Civil Engineering. Dissertation: A Computational Model for Coupled Hydraulic-Biochemical-Mechanical Processes of Municipal Solid Waste Degradation.
- Peter Mitchell DeJonge**, Field of Specialization: Epidemiological Science. Dissertation: Using Prospective Illness Surveillance Data to Quantify, Characterize, and Mitigate the Risk of Childcare-Associated Respiratory Disease.
- Joseph Richard DeLeon**, Field of Specialization: Film, Television, and Media. Dissertation: Social Media at the Margins: Crafting Community Media Before the Web.
- Giacomo Di Mauro**, Field of Specialization: Chemistry. Dissertation: Lipid-Nanodiscs Formed by Paramagnetic Polymers for Fast NMR Data Acquisition.

HORACE H. RACKHAM SCHOOL OF GRADUATE STUDIES

Doctor of Philosophy

- Kelsey Anne Diffley**, Field of Specialization: Chemistry. Dissertation: Regulation of Activity and Selectivity of Histone Deacetylases.
- Ryan Adam Dodson**, Field of Specialization: Chemistry. Dissertation: Solvent Effects in Metal-Organic Framework Activation, Resolvation, Synthesis, and Linker Exchange.
- Shengcheng Dong**, Field of Specialization: Bioinformatics. Dissertation: Computational Methods to Identify Regulatory Variants in the Non-Coding Regions of the Human Genome.
- Elizabeth Alexandra Druke**, Field of Specialization: Physics. Dissertation: Nonlinear Optical Effects in Weyl Semimetals and Other Strongly Correlated Materials.
- Audrey Veronne Eshun**, Field of Specialization: Chemistry. Dissertation: Investigations of Organic Molecules Using Entangled Photons as a Novel Spectroscopic Tool.
- Erin Eda Evke**, Field of Specialization: Materials Science and Engineering. Dissertation: Kirigami-Based Approaches to the Development of Highly Tunable Mechanical, Electrical, and Optical Systems and Devices.
- Negar Farzaneh**, Field of Specialization: Bioinformatics. Dissertation: Automated Decision Support System for Traumatic Injuries.
- Ian Fishback**, Field of Specialization: Philosophy. Dissertation: Method and the Morality of War.
- Nicholas Jonte Foster**, Field of Specialization: Chemical Biology. Dissertation: Defining Binding Principles to Target Coactivator Med25-Activator Interaction.
- Amy Fulton**, Field of Specialization: Higher Education. Dissertation: College President Responses to Student Activism on Campus.
- Oliver Jintha Gadabu**, Field of Specialization: Health Infrastructures and Learning Systems. Dissertation: Describing Documentation of Electronic Health Records (EHR) in Anti-Retroviral Therapy (ART) Clinics to Improve Data Quality for Healthcare Processes in Malawi.
- Patricia Marie Garay**, Field of Specialization: Neuroscience. Dissertation: Promoter Selection and Smith-Magenis Syndrome Protein Retinoic Acid Induced-1 in Neuronal Activity-Dependent Transcription.
- Kunal Garg**, Field of Specialization: Aerospace Engineering. Dissertation: Advances in the Theory of Fixed-time Stability with Applications in Constrained Control and Optimization.
- Jiseok Gim**, Field of Specialization: Materials Science and Engineering. Dissertation: Hierarchical Nanostructure of Natural Biominerals and Man-made Semiconductors.
- Leigh Gayle Goetschius**, Field of Specialization: Psychology. Dissertation: Violence Exposure and Social Deprivation: Neural Connectivity Correlates and Protective Factors.
- Mark Joseph Greenfield**, Field of Specialization: Mathematics. Dissertation: Some New Directions in Teichmüller Theory.
- Christian M. Greenhill**, Field of Specialization: Materials Science and Engineering. Dissertation: Influence of Composition and Morphology on the Electronic Properties of Semiconductor Nanostructures and Alloys.
- LoriAnne Groo**, Field of Specialization: Aerospace Engineering. Dissertation: Integrated Damage Sensing in Fiber-Reinforced Polymer Matrix Composites Using Nano- and Micro-Scale Materials.
- Maha Said Ahmed Abdeltawab Hanafi**, Field of Specialization: Medicinal Chemistry. Dissertation: Targeting Sigma-2 Receptor and ZFP91 in Pancreatic Cancer.
- John Henry Hansen**, Field of Specialization: Aerospace Engineering. Dissertation: Control Allocation of Flexible Aircraft for Load Alleviation.
- Michelle Harr**, Field of Specialization: Mechanical Engineering. Dissertation: The Effects of Temperature and Microstructure on Slip Localization in Microtextured Ti-6Al-2Sn-4Zr-2Mo under Dwell Fatigue.
- Sicheng He**, Field of Specialization: Aerospace Engineering. Dissertation: Aerodynamic Shape Optimization using a Time-Spectral Approach for Limit Cycle Oscillation Prediction.
- Whitney Michelle Hegseth**, Field of Specialization: Educational Studies. Dissertation: Respect by Design: How Different Educational Systems Interact with Mutual Respect in Classrooms.
- Matthew Hildner**, Field of Specialization: Mechanical Engineering. Dissertation: Modeling and Control of Transient Mixing Flow for Direct Ink Write Additive Manufacturing.
- Junho Hong**, Field of Specialization: Physics. Dissertation: The $N=4$ $SU(N)$ Super-Yang-Mills Index and Dual AdS Black Holes.
- Michael Yeungjun Hua**, Field of Specialization: Nuclear Engineering and Radiological Sciences. Dissertation: Advances in Microscopic, Time-Correlated Neutron Noise Techniques.
- Ignacio Jose Huerta Bravo**, Field of Specialization: Romance Languages and Literatures Spanish. Dissertation: Fascism, Populism and Common Sense in Spain: La Gaceta Literaria, La Conquista del Estado, F.E. y Vertice (1927-1939).
- Melissa Anne Hutcheson**, Field of Specialization: Physics. Dissertation: Search for the Rare Decay of the Neutral Kaon, $KL \rightarrow \pi^0 \pi^0$.
- Ameya Pranav Jalihal**, Field of Specialization: Cellular and Molecular Biology. Dissertation: To Find and to Form: Cellular Strategies for Intracellular Target Search and Higher-Order Assembly.
- Abhijit Jassem**, Field of Specialization: Nuclear Engineering and Radiological Sciences. Dissertation: Analysis of Non-Uniform Cathode Emission and Backward Wave Oscillations in a Traveling Wave Tube.
- Aman Kumar Jha**, Field of Specialization: Mechanical Engineering. Dissertation: Thermal Characterization of High-Power Diode Lasers Using Thermoreflectance.
- Lu Jie**, Field of Specialization: Electrical and Computer Engineering. Dissertation: Advanced Noise-Shaping Data Conversion Techniques.

HORACE H. RACKHAM SCHOOL OF GRADUATE STUDIES

Doctor of Philosophy

- Jacob Crossman Johnson**, Field of Specialization: Molecular and Integrative Physiology. Dissertation: Circadian Rhythms, Light, and Social Perception: Sensory Regulation of Lifespan in *Drosophila*.
- Garrett William Johnson**, Field of Specialization: Chemical Biology. Dissertation: High-Throughput siRNA Screening Reveals Epigenetic Proteins that Differentially Regulate Intratumoral Heterogeneity in Triple-Negative Breast Cancer.
- Louis Joslyn**, Field of Specialization: Bioinformatics. Dissertation: Multiscale Modeling of T Cells in Mycobacterium Tuberculosis Infection.
- Ilham Variansyah**, Field of Specialization: Nuclear Engineering and Radiological Sciences. Dissertation: A Robust Second-Order Multiple Balance Method and -Weighted Multigroup Constants for Time-Dependent Nuclear Reactor Simulations.
- Elnaz Kabir**, Field of Specialization: Industrial and Operations Engineering. Dissertation: Predictive and Prescriptive Analytics for Managing the Impact of Hazards on Power Systems.
- Dawn Marie Kaczmar**, Field of Specialization: English Language and Literature. Dissertation: Disability and Race in British Literature, 1580-1833.
- Steven Michael Karamihias**, Field of Specialization: Mechanical Engineering. Dissertation: Improvement of Inertial Profiler Measurements of Urban and Low-Speed Roadways.
- Mohammad Ali Kazemi Lari**, Field of Specialization: Aerospace Engineering. Dissertation: Multidisciplinary Study of Soft Shape Morphing Systems.
- Sarah Kearns**, Field of Specialization: Chemical Biology. Dissertation: Mechanism of Cytoskeleton Modification by Histone Methyltransferase SETD2.
- Jason Michael Keil**, Field of Specialization: Human Genetics. Dissertation: Symmetric Neural Progenitor Divisions Require Chromatin-Mediated Homology-Directed DNA Repair.
- Samantha Blake Kemp**, Field of Specialization: Molecular and Cellular Pathology. Dissertation: Elucidating Mechanisms of Immune Suppression in Mouse and Human Pancreatic Cancer.
- Sydney May Keough**, Field of Specialization: Philosophy. Dissertation: Self-Understanding and Narrative Explanation.
- Esmail Keyvanshokoo**, Field of Specialization: Industrial and Operations Engineering. Dissertation: Personalized Data-Driven Learning and Optimization: Theory and Applications to Healthcare.
- Eshita Khera**, Field of Specialization: Chemical Engineering. Dissertation: Engineering Tumor Distribution of Antibody-Drug Conjugates.
- Daeho Kim**, Field of Specialization: Civil Engineering. Dissertation: Toward Co-Robotic Construction: Visual Site Monitoring & Hazard Detection to Ensure Worker Safety.
- Taemin Kim**, Field of Specialization: Mechanical Engineering. Dissertation: Greenhouse Gas Reduction via Co-optimization of Alternative Diesel Fuels with Compression Ignition Engines.
- Jaywoo Kim**, Field of Specialization: Kinesiology and Mechanical Engineering. Dissertation: Evaluating the Effects of Powered Prostheses on Walking Biomechanics In and Out of the Lab.
- Matthew Jeffrey Krupcale**, Field of Specialization: Nuclear Engineering and Radiological Sciences and Scientific Computing. Dissertation: Modeling Dispersion of Radionuclides in the Turbulent Atmosphere.
- Alex Kukreja**, Field of Specialization: Biophysics. Dissertation: A Nanoscale Blueprint of the Human Kinetochores and the Functional Limits of Its Design.
- Aaron Y. Kurz**, Field of Specialization: Earth and Environmental Sciences. Dissertation: Mercury Stable Isotopes Identify Past and Present Mercury Sources and Cycling.
- Abigail May Lamb**, Field of Specialization: Molecular, Cellular and Developmental Biology. Dissertation: Genetic Determinants of the Development and Evolution of *Drosophila* Pigmentation.
- Nathalie Lambrecht**, Field of Specialization: Nutritional Sciences. Dissertation: Understanding the Role of Livestock Ownership on Anemia among Young Children in Ghana.
- Samantha Rose Lapehn**, Field of Specialization: Toxicology. Dissertation: Spatial and Temporal Protein Oxidation and Redox Signaling in Mechanisms of Structural Birth Defects.
- Charles Olson Leak**, Field of Specialization: Nuclear Engineering and Radiological Sciences. Dissertation: Techniques for Pixelated Ambipolar-Sensitive Semiconductor Gamma-Ray Spectrometers.
- HaEun Lee**, Field of Specialization: Nursing. Dissertation: Understanding the Association of Savings and Internal Lending Communities (SILCs) Participation and Household Wealth and Access of Reproductive Health Services (RHSS) in Rural Zambia.
- Jeongsup Lee**, Field of Specialization: Electrical and Computer Engineering. Dissertation: Implementations of Low-Power μ Processor System for Miniaturized IoT Applications.
- Saerom Lee**, Field of Specialization: Business Administration. Dissertation: Organizing for Entrepreneurship.
- Sage Lee**, Field of Specialization: Communication. Dissertation: Permanently Connected: Behavior, Perception, and Their Impact on News Sharing.
- Sangmin Lee**, Field of Specialization: Chemical Engineering. Dissertation: Assembly Behavior of Hard and DNA-Programmable Colloidal Shapes into Complex Crystal Structures.
- Suhak Lee**, Field of Specialization: Mechanical Engineering. Dissertation: Electrode-Specific Degradation Diagnostics for Lithium-Ion Batteries with Practical Considerations.
- Young-eun Lee**, Field of Specialization: Psychology. Dissertation: The Development of Responses to Unfairness in Children.

HORACE H. RACKHAM SCHOOL OF GRADUATE STUDIES

Doctor of Philosophy

- Manqi Li**, Field of Specialization: Business Administration. Dissertation: Data-Driven Operations Management.
- Nan Li**, Field of Specialization: Aerospace Engineering. Dissertation: Game-Theoretic and Set-Based Methods for Safe Autonomous Vehicles on Shared Roads.
- Claire Lin**, Field of Specialization: Applied and Interdisciplinary Mathematics. Dissertation: Efficient Model-Based Reconstruction for Dynamic MRI.
- Alexander Linsalata**, Field of Specialization: Cellular and Molecular Biology. Dissertation: Identification of Novel Modifiers of RAN Translation at FMR1 and C9ORF72.
- Bingjie Liu**, Field of Specialization: Industrial and Operations Engineering. Dissertation: Simulation Parameter Calibration with Field Operational Data: Methods and Applications.
- Chester Liu**, Field of Specialization: Electrical Engineering. Dissertation: Design of Configurable and Extensible Accelerator Architecture for Machine Learning Algorithms.
- Rundao Lu**, Field of Specialization: Electrical and Computer Engineering. Dissertation: CMOS mm-Wave Digital Beamformer Receiver with Parallelized Continuous-Time Band-Pass Delta-Sigma ADCs.
- Tianrui Luo**, Field of Specialization: Biomedical Engineering. Dissertation: MRI Excitation Pulse Design and Image Reconstruction for Accelerated Neuroimaging.
- Sabrina Rachel Lynch**, Field of Specialization: Biomedical Engineering. Dissertation: Non-Newtonian Stabilized Mass Transport Model: Applications to Thrombosis Research in Cardiovascular Hemodynamics.
- Lu Ma**, Field of Specialization: Physics. Dissertation: Electromagnetic Field Sensing with Rydberg Atoms in Vapor Cells.
- Jamie L. MacLennan**, Field of Specialization: Applied Physics. Dissertation: Rydberg Molecules and Excitation of Lattice-Mixed Rydberg States in a Deep Ponderomotive Optical Lattice.
- Shai Madjar**, Field of Specialization: Philosophy. Dissertation: Emotional Assessment and Emotion Regulation: A Philosophical Approach.
- Ifeanyi Kizito Madu**, Field of Specialization: Chemical Engineering. Dissertation: Understanding the Optical and Photophysical Properties of Organic and Hybrid Macromolecules and Polymers for Solar Cell Application.
- Lauren Marie Mancia**, Field of Specialization: Mechanical Engineering. Dissertation: Numerical Investigations of Cavitation-Induced Tissue Damage.
- Adam Alexander Markovitz**, Field of Specialization: Health Service Organization and Policy. Dissertation: Changes in Spending, Risk Selection, and the Response of Frontline Clinicians: Understanding Performance Mechanisms in the Medicare Shared Savings Program.
- Wesley Javier Marrero Colon**, Field of Specialization: Industrial and Operations Engineering. Dissertation: Data-Driven Decision Making in Healthcare.
- Candice Kaplan Martin**, Field of Specialization: Aerospace Engineering. Dissertation: Analysis of the Aerodynamics of Tumbling Spacecraft During Orbital Decay and Reentry.
- Jason Martinez**, Field of Specialization: Civil Engineering. Dissertation: Finite Element Analysis of Steel-Concrete Composite Floor Systems under Traveling Fires.
- Alvaro Giovanni Masias**, Field of Specialization: Materials Science and Engineering. Dissertation: Properties of Lithium Metal for Solid State Batteries.
- Carolyn Pietrucha Masserang**, Field of Specialization: Educational Studies. Dissertation: Understanding the Identities, Emotions, Attitudes and Motivations of Developmental Mathematics Students in the Context of Their Prior Learning and Life Experiences.
- Nina Brooks Masters**, Field of Specialization: Epidemiological Science. Dissertation: Understanding the Resurgence of an Eliminated Disease: Spatial, Attitudinal, and Regulatory Factors Underlying Measles Outbreaks in the Post-Elimination Era.
- David R. Mayers**, Field of Specialization: Applied Physics. Dissertation: New Applications of Satellite-Measured Tropical Cyclone Wind Speeds.
- Sara Marie Medfisch**, Field of Specialization: Chemistry. Dissertation: Optimization of Nanodisc Array Generation on Silicon Photonic Microring Resonators for Lipid-Protein and Membrane Protein-Protein Interaction Characterization.
- Peter Benjamin Meisenheimer**, Field of Specialization: Materials Science and Engineering. Dissertation: Disorder Engineering of Ferroic Properties.
- Bruna Menezes**, Field of Specialization: Chemical Engineering. Dissertation: A New Hybrid Agent-Based Model to Evaluate Antibody-Drug Conjugates in Solid Tumors.
- Aaron Huber Mininger**, Field of Specialization: Computer Science and Engineering. Dissertation: Expanding Task Diversity in Explanation-Based Interactive Task Learning.
- Seyedamirhossein Mirhosseininiri**, Field of Specialization: Computer Science and Engineering. Dissertation: Datacenter Architectures for the Microservices Era.
- Lillie Margaret Moffett**, Field of Specialization: Education and Psychology. Dissertation: Investigating the Feasibility of Preschool Interventions Targeting Children's Executive Functioning & Math Skills.
- Aakash Mohpal**, Field of Specialization: Economics. Dissertation: Essays in Development Economics.
- John Moon**, Field of Specialization: Electrical Engineering. Dissertation: Temporal Data Analysis Using Reservoir Computing and Dynamic Memristors.
- Emily Helen Mordan**, Field of Specialization: Chemistry. Dissertation: Addressing Common HPLC Detector Challenges Using Silicon Photonic Microring Resonators with Applications for Polymer Separations and More.
- Ellen Augusta Mulvihill**, Field of Specialization: Chemistry and Scientific Computing. Dissertation: Simulating Electronically Nonadiabatic Dynamics via the Generalized Quantum Master Equation.

HORACE H. RACKHAM SCHOOL OF GRADUATE STUDIES

Doctor of Philosophy

- Jaime Alejandro Muñoz Velázquez**, Field of Specialization: Psychology. Dissertation: Characterizing the Association Between Material Hardship Across Development and Connectome-Wide Brain Connectivity in Adolescents.
- Elizabeth Alice Nabney**, Field of Specialization: Classical Studies. Dissertation: Labour and Family Separation in Roman Egypt.
- Hideaki Nakao**, Field of Specialization: Industrial and Operations Engineering. Dissertation: Distributionally Robust Optimization in Sequential Decision Making.
- Jalal Adham Nasser**, Field of Specialization: Aerospace Engineering. Dissertation: Nanostructured Interphases for Improved Interfacial Adhesion in Structural and Ballistic Composites.
- Weixuan Nie**, Field of Specialization: Chemistry. Dissertation: Designing Novel Molecular Catalyst Systems for Electrochemical CO₂ Reduction with High Activity at Low Effective Overpotentials.
- Edward Nolan**, Field of Specialization: Classical Studies. Dissertation: Language and Difference in Herodotus.
- Cosme Almanzor Ochoa**, Field of Specialization: Robotics. Dissertation: Metalevel Motion Planning for Unmanned Aircraft Systems: Metrics Definition and Algorithm Selection.
- James Kayode Ofuegbe**, Field of Specialization: Naval Architecture and Marine Engineering. Dissertation: Relation at the Fluid-Structure Interface and Residual Force in Flow Induced Oscillations with Experimental Validation (VIV & Galloping).
- Nicole Olson**, Field of Specialization: Chemistry. Dissertation: Microscopic and Spectroscopic Analysis of Atmospheric Aerosols from Organic and Freshwater Sources.
- Amel Omari**, Field of Specialization: Health Behavior And Health Education. Dissertation: The Health Benefits of Educational Attainment and Citizenship for Racialized Migrants to France.
- Edison Ong**, Field of Specialization: Bioinformatics. Dissertation: Rational Vaccine Design by Reverse & Structural Vaccinology and Ontology.
- John David Orlet**, Field of Specialization: Chemistry. Dissertation: New Interfaces to Silicon Photonic Microring Resonator Arrays for Chemical Separations.
- Meghan Oster**, Field of Specialization: Higher Education. Dissertation: Performance-Based Funding: An In-Depth Policy Analysis.
- Zhicheng Ouyang**, Field of Specialization: Civil Engineering and Scientific Computing. Dissertation: Computational Frameworks for Probabilistic Performance-Based Wind Assessment of Envelope Systems of Engineered Buildings.
- Daniel Rocky Owen**, Field of Specialization: Nuclear Engineering and Radiological Sciences. Dissertation: Modeling Dose-Function Response and Toxicity Pathways in Non-Small Cell Lung Cancer Patients Undergoing Radiation Treatment.
- Sarah N. Owen**, Field of Specialization: Chemical Engineering. Dissertation: Application of Ultra-low Circulating Biomarkers and Single Cell Analysis from Solid Tumors with Single Molecule Resolution.
- Shaowu Pan**, Field of Specialization: Aerospace Engineering and Scientific Computing. Dissertation: Robust and Interpretable Learning for Operator-Theoretic Modeling of Non-linear Dynamics.
- Shruti Paranjape**, Field of Specialization: Physics. Dissertation: Bootstrapping Scattering Amplitudes in Effective Field Theories.
- Charles Park**, Field of Specialization: Biomedical Engineering. Dissertation: Immunoengineering Approaches for the Treatment of Cancer and Prevention of Infectious Diseases.
- Taeju Park**, Field of Specialization: Computer Science and Engineering. Dissertation: Optimization of In-Vehicle Network Design.
- Abhijit Parolia**, Field of Specialization: Molecular and Cellular Pathology. Dissertation: Characterizing and Targeting the Chromatin Determinants of Cancer Cell Identity: Cancer's Addiction to its Originating Cellular Lineage.
- Anita Patel**, Field of Specialization: Neuroscience. Dissertation: Gut-brain Axis Regulation of Food Intake and Visceral Illness.
- Hanzhang Pei**, Field of Specialization: Electrical and Computer Engineering and Scientific Computing. Dissertation: High Fidelity Coherent Pulse Stacking Amplification with Intelligent System Controls.
- Samuel Louis Pellone**, Field of Specialization: Mechanical Engineering. Dissertation: Vorticity Dynamics of Hydrodynamic Instabilities Occurring at Material Interfaces: Application to High-Energy-Density Systems.
- Yibo Pi**, Field of Specialization: Computer Science and Engineering. Dissertation: Evaluating and Improving Internet Load Balancing with Large-Scale Latency Measurements.
- Lisa Marie Pinatti**, Field of Specialization: Cancer Biology. Dissertation: Investigating Molecular Drivers of Human Papillomavirus (HPV)-Related Oropharyngeal Cancer.
- Jacqueline Mechtild Antoinette Popma**, Field of Specialization: Ecology and Evolutionary Biology. Dissertation: Deer Browsing Effects on Temperate Forest Biogeochemistry, Plant Community Composition, and Plant Chemistry.
- Michael Vernon Potter**, Field of Specialization: Mechanical Engineering. Dissertation: Advancing Human Lower-limb Kinematic Estimation Using Inertial Measurement Units.
- Alexa Rakoski**, Field of Specialization: Physics. Dissertation: Revisiting Unsolved Mysteries: A Journey Into Bulk and Surface Characteristics of Samarium Hexaboride Using Transport Measurements.
- Vyas Ramasubramani**, Field of Specialization: Chemical Engineering and Scientific Computing. Dissertation: Exploring the Limits of Hard Shape Models for Self-Assembly.
- Naomi Sasha Ramesar**, Field of Specialization: Chemical Engineering. Dissertation: Engineered Supraparticles and Their Photocatalytic Applications.
- Marlon D. Ramos**, Field of Specialization: Earth and Environmental Sciences. Dissertation: Physics-based Simulations of Large Earthquake Rupture Processes.

HORACE H. RACKHAM SCHOOL OF GRADUATE STUDIES

Doctor of Philosophy

- Kimberly Charis Ransom**, Field of Specialization: Educational Studies. Dissertation: There Are Children Here: Examining Black Childhood in Rosenwald Schools of Pickens County Alabama (1940-1969).
- Narathip Reamaroon**, Field of Specialization: Bioinformatics. Dissertation: Label Uncertainty and Learning Using Partially Available Privileged Information for Clinical Decision Support: Applications in Detection of Acute Respiratory Distress Syndrome.
- Nicole Chase Rockey**, Field of Specialization: Environmental Engineering. Dissertation: Novel Approaches to Monitor Virus Fate Through Water Treatment Processes.
- Attabey Rodríguez Benítez**, Field of Specialization: Chemical Biology. Dissertation: Selectivity Mechanisms Employed by Flavin-Dependent Monooxygenases.
- Christine Ann Rygiel**, Field of Specialization: Environmental Health Sciences. Dissertation: Perinatal Lead (Pb) Exposure's Effect on DNA Methylation and Hydroxymethylation and Risk of Adverse Neurodevelopmental Outcomes.
- Emily Rae Sabo**, Field of Specialization: Linguistics. Dissertation: Social Factors in the Production, Perception and Processing of Contact Varieties: Evidence from Bilingual Corpora, Nativeness Evaluations, and Real-time Processing (EEG) of Spanish-accented English.
- Anjan Kumar Saha**, Field of Specialization: Cancer Biology. Dissertation: The Genetics and Epigenetics of Centromeres in Cancer.
- Melody Sanders**, Field of Specialization: Chemical Biology. Dissertation: Understanding Transcription through Structural Characterization of the CBP-p53 Transcriptional Coactivator-Activator Complex.
- Jared Michael Scott**, Field of Specialization: Biomedical Engineering. Dissertation: Temporal Characteristics of High-Frequency Oscillations as a Biomarker of Human Epilepsy.
- Bryan Francis Sears**, Field of Specialization: Pharmacology. Dissertation: Investigating the Acute and Chronic Effects of Known and Novel Opioid Ligands.
- Omar Ashraf Omar Abdelkawy Sediak**, Field of Specialization: Civil Engineering and Scientific Computing. Dissertation: Multiscale Simulation and Assessment of the Seismic Resilience of Communities.
- Shriya Sethuraman**, Field of Specialization: Bioinformatics. Dissertation: Genome-wide Identification of Non-coding Transcription by RNA Polymerase V and Its Involvement in Transcriptional Gene Silencing.
- Qicang Shen**, Field of Specialization: Nuclear Engineering and Radiological Sciences and Scientific Computing. Dissertation: Robust and Efficient Methods in Transient Whole-Core Neutron Transport Calculations.
- Shilva Shrestha**, Field of Specialization: Environmental Engineering. Dissertation: Advancing Chain Elongation Technology for Medium Chain Carboxylic Acids Production from Waste Streams.
- Benjamin David Silcox**, Field of Specialization: Chemical Engineering. Dissertation: Stability and Cyclability Predictions of Redox Active Organic Molecules for Non-Aqueous Redox Flow Batteries.
- Derek Jeffery Smith**, Field of Specialization: Earth and Environmental Sciences. Dissertation: The Impact of Microbial Interactions and Hydrogen Peroxide on Western Lake Erie Cyanobacterial Blooms.
- Catherine Suzanne Snyder**, Field of Specialization: Materials Science and Engineering. Dissertation: Polymer Nanoparticle Design for Ovarian Cancer Therapies.
- Kelly A. Speth**, Field of Specialization: Biostatistics. Dissertation: Developing New Statistical Methods for Challenges in Evaluating Dynamic Treatment Regimes.
- Isaac Anton Spiegel**, Field of Specialization: Mechanical Engineering. Dissertation: Hybrid Systems, Iterative Learning Control, and Non-minimum Phase.
- Siddhartha Srivastava**, Field of Specialization: Aerospace Engineering. Dissertation: Graph Theoretic Algorithms Adaptable to Quantum Computing.
- Noah Isaac Steinfeld**, Field of Specialization: Cellular and Molecular Biology. Dissertation: Roles and Regulation of the Lipid Kinase, Vps34.
- Kristofer Stojanovski**, Field of Specialization: Health Behavior And Health Education. Dissertation: Systems Approaches to Visualize, Model, and Explore Stigma's Role in Socially Patterning HIV Risk Among Gay, Bisexual, and Other Men Who Have Sex With Men (GBMSM) in Europe.
- Felicia Sutanto**, Field of Specialization: Nuclear Engineering and Radiological Sciences. Dissertation: Fast Neutron Background Quantification in Water Cherenkov and Segmented Organic Scintillation Antineutrino Detectors.
- Yihao Tang**, Field of Specialization: Aerospace Engineering. Dissertation: Numerical Prediction of Turbulent Non-Premixed Forced Ignition in Altitude Relight.
- Sean Tanzey**, Field of Specialization: Medicinal Chemistry. Dissertation: Novel Approaches to PET Imaging Neurodegeneration.
- Eleni Temeche**, Field of Specialization: Materials Science and Engineering. Dissertation: Solid Electrolytes Derived From Precursors and Liquid-Feed Flame Spray Pyrolysis Nano-Powders to Enable the Assembly of All-Solid-State-Batteries.
- Emily A. Theriault-Kimmey**, Field of Specialization: Educational Studies. Dissertation: Researching a Practice of Teaching Elementary Mathematics Aimed at Disrupting Inequity and Promoting Justice.
- Brian Daniel Tobelmann**, Field of Specialization: Materials Science and Engineering. Dissertation: Design of High-Performance Surfaces for Controlling Phase Transformation.
- Audrey Elizabeth Tolbert**, Field of Specialization: Chemistry. Dissertation: Fully Selective Pb(II) Templated Heterotrimeric Redox and Hydrolytic Metalloenzymes.

HORACE H. RACKHAM SCHOOL OF GRADUATE STUDIES

Doctor of Philosophy

- Erica Elizabeth Twardzik**, Field of Specialization: Kinesiology and Epidemiology. Dissertation: Optimizing Post-Stroke Functioning: Using Mixed Methods to Understand the Role of Built and Social Environments for Physical Activity, Quality of Life, and Lived Experience.
- James Bryan Usevitch**, Field of Specialization: Aerospace Engineering. Dissertation: Advancements in Adversarially-Resilient Consensus and Safety-Critical Control for Multi-Agent Networks.
- Andrew David Usher**, Field of Specialization: Economics. Dissertation: Three Essays in the Economics of Price Setting.
- Daniel Oliver Walden**, Field of Specialization: Classical Studies. Dissertation: To Sing the Deeds of Men: Epithet and Identity in Homeric Epic.
- Ce Wang**, Field of Specialization: Molecular, Cellular and Developmental Biology. Dissertation: Physiological Relevance of Novel Lysosomal Ion Channels.
- Iris M. Wang**, Field of Specialization: Psychology. Dissertation: How Ecological Conditions Impact Sociality.
- Jieqiong Wang**, Field of Specialization: Architecture. Dissertation: Reimagining Shenzhen Urbanism: Villages-in-the-City, Architecture Biennales, and Modern City-Building.
- Qi Wang**, Field of Specialization: Mechanical Engineering. Dissertation: Stochastic Modeling of the Formation of Aromatics in Combustion.
- Tianlin Wang**, Field of Specialization: Electrical Engineering. Dissertation: Engineering Calibration and Physical Principles of GNSS-Reflectometry for Earth Remote Sensing.
- Xintong Wang**, Field of Specialization: Computer Science and Engineering. Dissertation: Computational Modeling and Design of Financial Markets: Towards Manipulation-Resistant and Expressive Markets.
- Xinyan Wang**, Field of Specialization: Nuclear Engineering and Radiological Sciences. Dissertation: The Gamma Deposition Matrix Method for Coupled Neutron-gamma Reactor Heating Calculations.
- Yuaning Wang**, Field of Specialization: Electrical and Computer Engineering. Dissertation: Computationally-Efficient Thermal Modeling Techniques for Electric Machines.
- Yuqi Wang**, Field of Specialization: Biological Chemistry. Dissertation: Exploring the Function of Polyphosphate in the Contact Pathway of Blood Clotting and Developing Polyphosphate Probes for Enhanced Specificity.
- Charles Fredrick Welch**, Field of Specialization: Computer Science and Engineering. Dissertation: Leveraging Longitudinal Data for Personalized Prediction and Word Representations.
- Shane Scott Wells**, Field of Specialization: Chemistry. Dissertation: Improving Sensitivity and Throughput for Bioanalytical Measurements with Mass Spectrometry using Microfluidics and Online Sample Preparation.
- Brendan Lee West**, Field of Specialization: Computer Science and Engineering. Dissertation: Streaming Architectures for Medical Image Reconstruction.
- Aaron White**, Field of Specialization: Physics. Dissertation: Searches for the Rare Decay of the Higgs Boson to Two Muons and for New Physics in Dilepton Final States with the ATLAS Experiment.
- Leighton Wayne Wilson**, Field of Specialization: Applied and Interdisciplinary Mathematics and Scientific Computing. Dissertation: Development and Application of Numerical Methods in Biomolecular Solvation.
- Bartosz Woda**, Field of Specialization: Economics. Dissertation: Essays on International Worker Mobility.
- Deokoh Woo**, Field of Specialization: Architecture. Dissertation: Model Predictive Control-based Surface Condensation Prevention for Thermo-active Building Systems (TABS): In Regard to the Partial Theoretical Model Approach.
- Wenhao Xu**, Field of Specialization: Physics. Dissertation: Observation of W W W Production in Proton-Proton Collisions at $\sqrt{s} = 13$ TeV with the ATLAS Detector.
- Daniel Francis Yang**, Field of Specialization: Sport Management. Dissertation: Uncovering Institutional and Organizational Factors Influencing Corporate Philanthropy in Professional Sport: Why Some Teams Give More than Others.
- Yu Yao**, Field of Specialization: Robotics. Dissertation: Collection and Analysis of Driving Videos Based on Traffic Participants.
- Qiushi Yu**, Field of Specialization: Political Science and Scientific Computing. Dissertation: Bayesian Latent Variable Models for Discrete Choice Data.
- Mostafa Mahmoud Mohamed Zaky**, Field of Specialization: Electrical Engineering. Dissertation: Electromagnetic Modeling for Radar Remote Sensing of Snow-Covered Terrain.
- Chengwei Zhai**, Field of Specialization: Industrial and Operations Engineering. Dissertation: Simulating Long-Term and Short-Term Community and Infrastructure Vulnerability and Response to Natural Hazards.
- Songan Zhang**, Field of Specialization: Mechanical Engineering. Dissertation: Synthesis and Evaluation of Automated Vehicles.
- Xin Zhang**, Field of Specialization: Mathematics. Dissertation: Topics in Stochastic Analysis and Control.
- Chunyi Zhao**, Field of Specialization: Chemistry. Dissertation: Development of Collision Induced Unfolding for the Study of Large Multiprotein Complexes.
- Boyi Zheng**, Field of Specialization: Electrical and Computer Engineering. Dissertation: Multiple-element Direct Digital Beamforming For Next Generation Wireless Communication System.
- Nina Zhou**, Field of Specialization: Biostatistics. Dissertation: Synthetic Data Sharing and Estimation of Viable Dynamic Treatment Regimes with Observational Data.
- Wenqing Zhou**, Field of Specialization: Naval Architecture and Marine Engineering. Dissertation: Modeling of Welding-Induced Distortion Effects on Fatigue Behaviors of Lightweight Shipboard Structures.

Dear Graduate:

On behalf of the Alumni Association of the University of Michigan, congratulations on your momentous achievement.

You have faced unique challenges during this unprecedented time, but that doesn't diminish the goal you have realized after years of hard work. You have earned a place among the 635,000-plus Leaders and Best in 180 countries across the globe.

As a graduation gift, we give you a complimentary one-year membership to help you maintain a strong, meaningful connection back to the University and alumni for years to come. Visit alumni.umich.edu to keep the spirit of U-M close and connect to the powerful global network of U-M alumni.

On behalf of the entire U-M family, we extend our congratulations on a job well done at Michigan. And welcome to the Wolverine family!

Sincerely,

Bob Stefanski, MSE'86, JD'89
Chair of the Board of Directors
Alumni Association of the
University of Michigan

Steve Grafton
President and CEO
Alumni Association of the
University of Michigan

Alumni Association of the University of Michigan
