HONORARY DEGREE RECIPIENT

Jeffrey E. Cappel

Doctor of Laws

From the start of Jeffrey E. Cappel's long career as a salesman and entrepreneur, he understood that human relationships are the beating heart of any successful business. Not afraid of hard work and long hours, Cappel entered the workforce as a door-to-door salesman for Kirby vacuum cleaners. His strong aptitude for building connections quickly helped him find early success in sales and it wasn't long before Cappel shifted his attention to cars. He started working in automotive sales and, after moving to Ann Arbor's Varsity Ford, he quickly became a top salesman. Not one to rest on his laurels, Cappel diversified his portfolio early on by investing in student housing and local businesses. He also purchased his first car dealership in Morristown, Tennessee, where he later moved to, and founded what would become Victory Automotive. With headquarters now in Canton, Michigan, Victory Automotive Group has expanded to sixty locations across twelve different states.

Aside from his acute business acumen, Cappel is a champion of educational equity and community service. His sustained philanthropy and commitment to promoting educational equity include establishing the Victory Program at Country Day World School in Largo, Florida, which supports children with autism. He also funds need-based scholarships for students in Michigan and California and supports the Doctors of Tomorrow programs at Michigan Medicine, which encourages students from underrepresented communities in Detroit to pursue careers in healthcare. Mr. Cappel has also made significant contributions to our community through the world of healthcare. He is a dedicated philanthropist who generously supports various causes such as innovative research in cancer, transplantation, and cardiology, as well as work that seeks to improve healthcare safety and quality. His humanitarianism also extends to the University of Michigan, where he supports several athletic scholarships, started the Cappel Sales Track, and created the Cappel Family Professorship of Business Administration at the Ross School of Business. Throughout his career, Cappel has demonstrated an unwavering passion for fostering learning environments that are inclusive, innovative, and accessible to all.

HONORARY DEGREE RECIPIENT

France A. Córdoba

Doctor of Science

As a distinguished astrophysicist, academic leader, and public servant, France A. Córdoba has long been at the forefront of advancing science and technology. She has held numerous leadership positions, serving as the Director of the National Science Foundation, NASA's Chief Scientist, and President of Purdue University, shattering the glass ceiling and creating opportunities for future scientists.

Initially earning a degree in English from Stanford University in her home state of California, the Apollo 11 moonwalk in 1969 fascinated Córdoba and led her to pursue a doctoral degree in physics. She completed her degree from the California Institute of Technology in 1979 as one of only two women in a physics class of 18. After graduation, she became a staff scientist and deputy group leader in the Los Alamos National Laboratory's Earth and Space Sciences division, studying white dwarfs and pulsars. In 1989, Córdoba left New Mexico to head the Department of Astronomy and Astrophysics at Penn State University. In 1993, she became the first female Chief Scientist

at NASA and, during her tenure there, she earned a Distinguished Service Medal, NASA's highest honor. In 1997, the Pathfinder rover landed on the surface of Mars carrying a CD-ROM with a dedication to Córdoba in recognition of her contributions to the Pathfinder program. Córdoba has also made numerous contributions to the field of observational and experimental astrophysics. Having published more than 150 scientific papers and numerous science policy papers, she is widely known for her multi-spectral research on X-ray and gamma-ray sources and space-borne instrumentation. She was also co-principal investigator for a telescope experiment currently flying on the satellite XMM-Newton, a cornerstone mission of the European Space Agency.

Following her time at NASA, Córdoba worked as a physics professor and vice chancellor for research at the University of California, Santa Barbara from 1996 to 2002; and she served as a chancellor and distinguished physics and astronomy professor at the University of California, Riverside until 2007. At Riverside, Córdoba laid the foundation for California's first public medical school in more than 40 years. Following her work at the University of California, Córdoba became the first woman to serve as Purdue University's President. As President, Córdoba raised more than one billion dollars in private gifts, including a \$300 million Access and Success scholarship campaign to serve high-achieving, low- and middle-income students. She has served in government during five presidential administrations, both Democratic and Republican. She was confirmed by the US Senate as Director of the National Science Foundation in 2014 while serving on the National Science Board. Currently, Córdoba serves as President of the Science Philanthropy Alliance, which aims to advance science through visionary philanthropy.

HONORARY DEGREE RECIPIENT

Victor J. Dzau
Doctor of Science

Since 2014, Victor J. Dzau has served as President of the National Academy of Medicine and Vice Chair of the National Research Council, bringing exceptional leadership to the intersection of science, medicine, and policy. A distinguished physician and medical researcher, he is also a trailblazer—the first person of color and first immigrant to lead one of the three academies that make up the National Academies of Sciences, Engineering, and Medicine.

Born in Shanghai during the Communist Revolution, Dzau was still a child when his family fled to Hong Kong to escape the Chinese Civil War. His early experiences with poverty and health inequities shaped his commitment to a career in medicine. He earned Bachelor of Science in Biology and an M.D. from McGill University before starting his residency at Peter Bent Brigham Hospital and Harvard. Recognized internationally for his groundbreaking contributions to cardiovascular medicine and genetics, Dzau's research laid the foundation for the development of lifesaving drugs called ACE inhibitors,

which are now widely used to treat high blood pressure, congestive heart failure, and kidney disease. He pioneered gene therapy for vascular disease and was the first to introduce DNA decoy molecules in humans *in vivo*. Dzau developed the Paracrine Hypothesis of stem-cell action and the strategy of direct cardiac reprogramming.

Dzau is renowned for being a visionary leader who develops initiatives to transform healthcare and seek solutions to broad-reaching social challenges. At the National Academy of Medicine, he launched significant initiatives such as the Global Health Risk Framework, Human Genome Editing Initiative, and Grand Challenge in Climate Change and Human Health and Equity. He co-founded Duke's Global Health Institute, Harvard's Brigham and Women's Hospital's Division of Global Health Equity, and Duke's National University of Singapore School of Medicine. His past leadership roles include professor and chairman of medicine at Harvard and Stanford, chancellor emeritus for health affairs at Duke University, and CEO of the Duke University Health System. At the National Institutes of Health, he served on the director's Advisory Committee and chaired the Cardiovascular Disease Advisory Committee. Dzau has received the Gustav Nylin Medal from the Swedish Royal College of Medicine; the Research Achievement Award from the American Heart Association; the Ellis Island Medal of Honor; the Polzer Prize of the European Academy of Sciences and Art; the Henry Friesen International Prize; the Porter Prize of the University of Pittsburgh; and National University of Singapore's Outstanding Service Award and Singapore National Day Public Service Medal. He has received 21 honorary doctorates over his long career and was a member of the University of Michigan's Health Board.

HONORARY DEGREE RECIPIENT

Frank Micelotta, Fox Sports

Derek Jeter
Doctor of Laws

By the time he stepped away from baseball in 2014 after a historic 20-year career, Derek Jeter had established himself as one of the most respected men to have played the game. His relentless pursuit of excellence, resilience in overcoming challenges, and steadfast commitment to his craft have propelled him to succeed in baseball, business, and media. His passion for giving back to the community has also led him to create transformative opportunities for youth.

Having grown up in Michigan, Jeter began attending class at the University of Michigan in 1992 with the intent to play baseball but was selected by the New York Yankees in that year's draft. In 1994, Jeter was named Minor League Player of the Year, and, shortly thereafter, he earned MLB's American League Rookie of the Year award by unanimous vote in 1996. That same year, Jeter and his father founded the Turn 2 Foundation, which creates and supports signature programs and activities that motivate young people to turn away from drugs and alcohol and "Turn 2" healthy lifestyles. Through

these ventures, the Foundation promotes and rewards academic excellence, leadership development and positive behavior. Turn 2 has awarded more than \$45 million in grants, with a portion of those funds directed to communities in West Michigan, Tampa, and New York City.

During his time with the Yankees, he helped the team win three consecutive World Series, received 14 All-Star selections, five Gold Glove Awards, five Silver Slugger Awards, and, in 2000, he became the only player named the All-Star Game and World Series MVP in the same year. When Jeter retired in 2014, it was as a five-time World Series champion and a member of baseball's exclusive 3,000-hit club. In recognition of his on-field accomplishments and impact on the game, he was elected to the Baseball Hall of Fame in 2020.

Jeter's post-baseball career has been marked by numerous successes in business and entrepreneurship. Highlights include launching The Players' Tribune, an online platform where athletes can publish their own stories in their own words, and Jeter Publishing, an imprint in partnership with Simon & Schuster that has produced New York Times bestsellers across the children's and adult space. He continued to expand his work in media by joining the MLB on FOX team and launching Cap 2 Productions, an entertainment company producing shows focusing on premium, uplifting, and family-friendly content. From 2017-2022, Jeter served as part-owner and CEO of MLB's Miami Marlins and was the first African American to serve in this role for any Major League team in the sport's history. He also has been actively involved in successful business launches, including Greatness Wins, Arena Club, Cumulus Coffee and more.

STUDENT SPEAKERS

Emerson Krause

Bachelor of Arts in Political Science

College of Literature, Science, and the Arts

Emerson Krause, from North Carolina, maintained a 4.0 GPA while earning his degree in political science from U-M's College of Literature, Science, and the Arts. He is a James B. Angell Scholar, has appeared on U-M's Engineering Dean's List, received University Honors for three semesters, and worked as a researcher for the Department of Naval Architecture and Marine Engineering. He also mentored first-year students engaged in research and served as the Disabilities Empowerment and Advocacy Commissioner on U-M's Central Student Government. An avid climber, Krause was on the Michigan Climbing Team and served on the executive board of the Michigan Climbing Club. In the fall, Krause will pursue a master's degree in political science at the University of Calgary, focusing on group bias in German counter-terrorism and extremism prevention approaches.

Ava Smith

Bachelor of Science in Data Science

College of Literature, Science, and the Arts

Originally from New York City, Ava Smith earned a spot on the Dean's List for seven consecutive semesters while studying data science, with a minor in entrepreneurship, in U-M's College of Literature, Science, and the Arts. Smith was one of 19 contestants competing in the 11th season of Michigan Survivor, finishing fourth; she tutored college students in computer science and calculus all four years; and, during her time in the Kappa Delta sorority, she helped run STEM workshops for Girl Scouts and charitable fundraising events. During her summers, Smith worked as a data science intern at the New York-based nonprofit Phipps Neighborhoods and a technology consultant intern at the accounting and consulting firm EY (formerly known as Ernst & Young). Smith plans to return to EY as a technology consultant.

Lucas Solomon

Bachelor of Arts in Organizational Studies and Psychology

College of Literature, Science, and the Arts

While majoring in organizational studies and psychology at U-M's College of Literature, Science, and the Arts, and minoring in Coaching and Leadership in the Marsal Family School of Education, Lucas Solomon founded the Michigan Youth Sports Initiative (MYSI), a nonprofit that addresses pay-to-play barriers for local disadvantaged youth. As President of MYSI, Solomon built 9 business partnerships and raised over \$70,000 to cover coaching, costs, and equipment for 300 players on youth flag football, soccer, wrestling, and basketball teams. On campus, Solomon served as vice president of AEPi and captain of his intramural hockey team. During summers, Solomon interned at Rockbridge Growth Equity, the National Hockey League, and Accenture. Solomon now plans to return to Accenture in New York City, where he will join a two-year developmental rotation program providing experience across consulting and corporate functions.

THE UNIVERSITY MACE

The University's mace is a symbol of academic scholarship, integrity, and authority. It is carried by the chair of the University Senate at the head of academic processions on such important ceremonial occasions as commencements, convocations, and inaugurations, representing the connection of all faculty members to important academic rituals. The mace being used today was given to the University in 1968 by the Senior Board, representing all the undergraduate schools and colleges. Crafted of red oak and trimmed with silver, the mace features the seals of the University and of the State of Michigan. Also engraved on the mace are the names of the University Presidents.

ACADEMIC COLORS

Each discipline is represented by a unique color. Mingled colors distinguish combined curriculums.

Architecture and Urban Planning	<i>blue-violet</i>
Business Administration	<i>drab</i>
Dentistry	<i>lilac</i>
Education	<i>light blue</i>
Engineering	<i>orange</i>
Environment and Sustainability	<i>russet</i>
Fine Arts	<i>brown</i>
Information	<i>lemon</i>
Kinesiology	<i>sage green</i>
Law	<i>purple</i>
Literature and Arts	<i>white</i>
Medicine	<i>green</i>
Music	<i>pink</i>
Nursing	<i>apricot</i>
Pharmacy	<i>olive green</i>
Philosophy	<i>dark blue</i>
Public Health	<i>salmon pink</i>
Public Policy	<i>peacock blue</i>
Science	<i>golden yellow</i>
Social Work	<i>citron</i>

ACADEMIC DRESS AND CUSTOM

The colorful gowns and hoods worn by faculty members at commencement and other academic ceremonies represent the degrees, disciplines, and alma maters of the wearers. The American academic costume tradition, imported from England, dates to Colonial days.

Gowns

Bachelor's or master's degree gowns traditionally are black, as are many doctoral gowns in the United States. Some universities prescribe that their graduates wear gowns of another solid color such as blue, crimson, or green. Gowns differ in sleeve cut and trim. For example, the bachelor's gown has long, pointed sleeves while the master's gown has oblong sleeves. Doctoral gowns, with their distinctive bell-shaped sleeves, feature velvet panels down the front and around the neck, as well as crossbars of velvet on the sleeves. Colored trim denotes the field or discipline in which the degree was earned. Usually only a single degree from one institution is indicated by a garment. If more than one degree is held, the gown and hood of the higher or highest degree usually are worn.

Hoods

The hood most precisely describes the wearer's level of degree earned, the major field of learning, and the alma mater. The level of the degree held is indicated by the hood's shape and size and the width of its velvet or velveteen trimming. The bachelor's, master's, and doctor's hoods are 36 inches, 42 inches, and 48 inches long, respectively. The velvet trim is two, three, and five inches wide, with the narrowest being for the bachelor's hood and the widest for the doctor's hood. The color of trim on the hood, as on the gown, identifies the major field of learning in which the degree was awarded. The hood is lined with the official colors of the college or university conferring the degree.

Caps

Caps vary in style from the traditional black mortarboard to eight-, six-, and four-corner tams, and Elizabethan-style caps. The mortarboard may be of any appropriate material, such as cotton, poplin, rayon, or silk, to match the gown. Velvet is reserved for holders of doctorates.

SCHOOLS AND COLLEGES OF THE UNIVERSITY

The order of presentation is by the year of founding.

College of Literature, Science, and the Arts

The College of Literature, Science, and the Arts, founded in 1841, was the first duly constituted college of the University of Michigan. Today, with more than 15,000 undergraduate and 2,000 graduate students, LSA is the largest of the University's schools and colleges, and it is still the heart of the campus. Distinguished in the humanities since its earliest years, the college became preeminent in the natural sciences during the early 20th century and went on to become a world leader in social science research. The college has always been dedicated to providing a richly diverse liberal arts education that prepares students to lead fulfilling lives as responsible citizens within a wide range of professional careers.

Medical School

Since opening its doors in 1850, the Medical School has been a leader in medical education, patient care, and biomedical research. In addition to its professional doctor of medicine program, the Medical School offers master's and doctoral degrees in the basic medical sciences. The school established the nation's first university-owned and -operated teaching hospital and created the first departments of pharmacology and human genetics in the United States. It also played an important role in the development of the electrocardiogram and in the development of iodized salt as a goiter preventive. The Medical School was among the first major American medical schools to graduate women and African Americans; today there are more practicing M.D.s from the University of Michigan than from any other medical school in the United States.

Law School

Founded in 1859, the Law School awarded its first bachelor of laws degrees in 1860. In 1870, the school became the second in the nation to confer a law degree on an African American candidate and the first major law school to admit a woman. In 1871, one of the school's graduates became the first woman with a law degree to be admitted to the bar. A national law school from its earliest years, the school's graduates work in every state of the union and in more than 73 countries, in business, as practitioners and professors, as legislators and members of Congress, and as distinguished civil servants and members of the judiciary.

School of Dentistry

Established in 1875, the School of Dentistry first granted the professional degree, doctor of dental surgery, the following year. A national leader in the training of professional dentists and long active in oral and craniofacial research, the school offers the doctor of dental surgery, master's degrees, and graduate clinical programs in several dental specialties and general dentistry. A doctoral degree is offered in oral health sciences and in an interdepartmental program in biomaterials. The School of Dentistry also offers baccalaureate and master's programs in dental hygiene.

College of Pharmacy

As the first College of Pharmacy in the United States at a public institution, it was first established as a department in 1868 and later a college in 1876. The college is consistently top-ranked nationally and has a distinguished history of leading at pharmacy's edge, making significant discoveries that have advanced the field and improved health outcomes. A long history of innovators, including the Upjohn, Lilly, and Walgreens family members, have graduated from the college. It also founded Rho Chi, the Pharmacy Honor Society, Phi Delta Chi, pharmacy's professional fraternity, and the first hospital residency program. Today, the college has an average annual enrollment of ~600 students: 125 bachelors in pharmaceutical sciences, 325 doctors of pharmacy, and 140 masters in integrated pharmaceutical sciences and doctors of philosophy across three programs with research expertise in drug discovery, drug development, drug utilization, and health outcomes.

Horace H. Rackham School of Graduate Studies

The Horace H. Rackham School of Graduate Studies oversees and coordinates graduate education, bringing together graduate students and faculty from across the institution to experience and take full advantage of the University as a scholarly community. The University awarded its first master of arts degree in 1849, first master of science degree in 1859, and first doctor of philosophy degree in 1876. Organized as a department in 1892, the School of Graduate Studies became an autonomous unit in 1913. In 1935, a generous gift from Horace H. and Mary A. Rackham included the site and construction of the Rackham Building for graduate studies and a substantial endowment for carrying on graduate work and research.

Gerald R. Ford School of Public Policy

The School of Public Policy prepares graduates for distinguished careers in policy analysis and management, and promotes improved public policy through research. Its curriculum combines rigorous grounding in contemporary social science, opportunities to develop expertise in a variety of policy domains, and practical experience. Graduates work in government and the private and nonprofit sectors, using their knowledge, judgment, and new ideas to solve social problems, both domestic and international. The school traces its history to the Institute of Public Administration, established in 1914 as one of the first programs in municipal administration in the United States. In 1999, the regents approved the naming of the school in honor of Gerald R. Ford, the 38th President of the United States and a 1935 graduate of the University.

College of Engineering

Instruction began with a class in civil engineering in 1854. Historically, the College of Engineering has been a leader in establishing departments in emerging fields, including metallurgical engineering, naval architecture and marine engineering, electrical engineering, chemical engineering, aeronautical engineering, nuclear engineering, and computer engineering. Today, the college and its 60,000 alumni provide leadership in various technologies, healthcare, business, and the sciences, improving the quality of people's lives around the world.

Marsal Family School of Education

The Marsal Family School of Education was founded in 1921, 42 years after the University established the first chair in any United States collegiate institution devoted to the "science and art of teaching." The school prepares students for professional careers in teaching and administration, and offers advanced training for researchers and practitioners at all levels of education. Teacher diplomas were first offered in 1874; the first master's degree in education was conferred in 1891, the first Ph.D. in 1902, and the first Ed.D. in 1938.

Stephen M. Ross School of Business

Formally established in 1924, the Stephen M. Ross School of Business operates on the mission of building a better world through business. Today, at all levels of instruction — undergraduate, graduate, and executive education — its programs rank among the world's top business schools, preparing students to excel and lead in a dynamic world. Each year, as many as 1,600 new Michigan Ross graduates enter careers in business and academia, joining the more than 58,000 who already serve in leadership positions in business, government, and academic institutions throughout the world.

School for Environment and Sustainability

The clear-cutting of Michigan's densely forested wilderness was well underway when the University of Michigan began offering courses in forestry in 1881—the first university in the United States to do so. The year 1903 saw the creation of a Department of Forestry, forerunner of today's School for Environment and Sustainability (SEAS). The school's students and faculty organized the famous 1970 Teach-In on the Environment (the prototype of Earth Day), and incubated the scholarly disciplines of Environmental Justice, Environmental Education, and Environmental Informatics. From its inception as a forestry school to the interdisciplinary institution it is today, SEAS has always prepared leaders to understand and solve the major environmental challenges of the era.

School of Music, Theatre & Dance

Consistently ranked among the top performing arts schools in the nation, and one of the oldest, the School of Music, Theatre & Dance is committed to creating an environment of educational and artistic excellence, nurturing creativity, academic integrity, and professionalism in its students and faculty. With degrees offered at the bachelor's, master's, and doctoral levels, the School is deeply engaged in the creation, practice, scholarship, and pedagogy of music, theatre, and dance. It fosters a spirit of social responsibility and principled entrepreneurship and serves the community and state of Michigan through public performances, cultural resources, arts education, and outreach programs.

A. Alfred Taubman College of Architecture and Urban Planning

Michigan offered its first courses in architecture in 1876. The program became a department in 1913, and by 1931, the College of Architecture was established as a separate entity. During the 1940s, the college was one of the few schools in the country to consider research a necessary part of architectural education, and in 1946 it became the first to introduce a graduate program in urban planning. The college offers master of architecture, master of urban planning, and master of urban design degrees; bachelor of science and master of science degrees in architecture; and doctoral programs in architecture and in urban and regional planning. In 1999, the college was named in honor of A. Alfred Taubman, founder and chairman of The Taubman Company, Inc., and a longtime friend, supporter, and adviser to the college.

School of Nursing

The University of Michigan School of Nursing (UMSN) is an international leader in the advancement of nursing knowledge and strategies to improve health care. In addition to the four-year BSN program and the second career in nursing program, UMSN has a robust offering of graduate programs. Students are prepared to be leaders in advanced clinical practice through our M.S.N. and post-baccalaureate Doctorate of Nursing Practice (DNP) programs. Students can also lead and effect change through the M.S.N. or post-masters DNP programs in systems, populations, and leadership. UMSN's prestigious Ph.D. and postdoctoral programs prepare nurse scientists to develop the knowledge necessary to support and advance nursing practice.

School of Public Health

Founded in 1941 and ranked among the country's top public health schools, the University of Michigan School of Public Health educates more than 1,000 graduate and undergraduate students each year. With over 170 faculty and researchers across six departments and numerous collaborative centers and institutes, the school brings interdisciplinary, innovative solutions to complex health challenges, including chronic and infectious diseases, obesity and food insecurity, health care quality and cost, climate change and environmental factors, and socioeconomic inequalities and their impact on health. Compassion, innovation, and inclusion drive the faculty, staff, students, and 15,000 alumni of Michigan Public Health to pursue positive change and lasting impact on the health of the world.

School of Social Work

The program in social work began in 1921, and was granted the status of a school in 1951. Faculty maintain high research productivity while teaching an innovative curriculum. At the master's level, the school prepares professional practitioners for work with individuals, children and their families, the aged, organizations, and communities. Students may focus their studies in the fields of substance abuse, mental health, education, child welfare, program evaluation, and public policy. The joint doctoral program in social work and social science is one of a kind and prepares students for academic and research careers. Graduates of both programs are found in leadership positions around the world. The School of Social Work consistently ranks as one of the best in the nation.

School of Information

A formal program began in 1926, when the Department of Library Science was created in the College of Literature, Science, and the Arts. In 1948, offerings became entirely graduate and a doctoral program was inaugurated. Establishment of an independent school, committed to the interdisciplinary study of information and library principles, came in 1969. In response to the rapid change brought on by present technology, the school broadened significantly further in the 1990s. It now pursues a highly interdisciplinary approach to educate professionals who will serve as leaders in the information age. Recognizing this broader mission, the school was renamed the School of Information in 1996.

Penny W. Stamps School of Art & Design

The Penny W. Stamps School of Art & Design traces its history at the University to visual arts education in the late 19th century, awarding its first degree in 1960, and becoming a University of Michigan school in 1974. In 2002, the school launched a unique curriculum that prompted the National Association of Schools of Art and Design to report, "The School of Art & Design and the University of Michigan have created an opportunity to lead the academic conversation in art and design in this country." The school prepares graduates for a broad range of creative professions through its undergraduate and graduate programs. Commitment to the integration of art and design, community engagement, international experience, connections to the academic resources of the University, interdisciplinary pursuit, and public presentation of creative work are required of all majors.

School of Kinesiology

Kinesiology has been part of the University of Michigan curriculum since the turn of the 20th century and joined the ranks for the schools and colleges as an independent unit in 1984. Concentrations have the common thread of human movement and span a wide range including movement science, physical education, sport management, and athletic training. Kinesiology prepares undergraduates for careers as diverse as medicine and physical therapy to athletic administration, marketing, and law. Master's and doctoral students expand their opportunities in higher education, research, health care, public health or medicine, business, and law.

CANDIDATES FOR DEGREES AND CERTIFICATES

The following is a list of the candidates for degrees to be granted upon completion of formal requirements. Candidates are recommended jointly by the school faculty and the Executive Board of the Graduate School, and are listed alphabetically by degree, and in some cases also by field of specialization, under the school or college which awards the degree. The listing begins with doctoral degrees and then in order of founding of the schools and colleges.

The Executive Board of the Horace H. Rackham School of Graduate Studies awards doctoral, master's, and some graduate professional degrees (e.g., master of public policy, master of urban planning). However, most graduate professional degrees, such as doctor of medicine, master of social work, etc., are awarded by the respective schools or colleges. The Graduate School does not offer course work, and advanced studies are conducted within the school or college of a candidate's area of specialization.

This program presents as complete and accurate a record of candidates for degrees as is possible as of the publication date.

HORACE H. RACKHAM SCHOOL OF GRADUATE STUDIES

Founded in 1912, Michael J. Solomon, Dean and Vice Provost for Academic Affairs–Graduate Studies

Doctor of Musical Arts

Benjamin William Gaughran, Field of Specialization:

Conducting (Choral). Dissertation: Summary of Dissertation Recitals: Three Choral Programs.

Alexis Lamb, Field of Specialization: Music Composition. Dissertation: Resonant Gratitude.

Rosanne Lee, Field of Specialization: Music Performance. Dissertation: Summary of Three Dissertation Recitals.

Alexander Russell John Scott, Field of Specialization:

Conducting (Band). Dissertation: A Summary of Three Dissertation Recitals.

Yongxin Zhou, Field of Specialization: Music Performance. Dissertation: Notes on Three Dissertation Performances.

Doctor of Philosophy

Mohamed Arshath Saja Abdul Kaiyoom, Field of Specialization: Aerospace Engineering and Scientific Computing. Dissertation: Numerical Methods for Coupled Aeropropulsive Design Optimization.

Carlos Raul Acuna Silva, Field of Specialization: Business Administration. Dissertation: Three Essays in Finance.

Eytan J. Adler, Field of Specialization: Aerospace Engineering and Scientific Computing. Dissertation: Hydrogen-Powered Aircraft Design Optimization.

Devansh Ramgopal Agrawal, Field of Specialization: Aerospace Engineering. Dissertation: Architectures for Safe Autonomy: Provable Guarantees Across Control, Planning, and Perception.

Omar Yusuf Ahmed, Field of Specialization: Mechanical Engineering. Dissertation: Multivariable Combustion Control for Engines Operating Near High-Variability Limits.

Arsha Ali, Field of Specialization: Robotics. Dissertation: Situation Awareness and Trust Methods for Improving Human-Robot Team Performance.

Hessa Khaled H. A. Al-Thani, Field of Specialization: Industrial and Operations Engineering. Dissertation: Exact and Approximation Algorithms for Entropy Sampling and Stochastic Optimization.

Anna Grace Anders, Field of Specialization: Chemistry. Dissertation: Development of Ion Mobility-Mass Spectrometry and Collision-Induced Unfolding for the Structural Characterization of Noncoding Ribonucleic Acids.

Aubrey Childs Annis, Field of Specialization: Biostatistics. Dissertation: Methods and Applications for Improving Interpretation of Genetic and Genomic Data.

Emily Kathryn Arntson, Field of Specialization: Health Service Organization and Policy. Dissertation: Evaluating the Impacts of Federal Social Programs on Older Adults in the United States of America: Three Essays in Health Economics.

Peter Julian Arts, Field of Specialization: Environmental Engineering. Dissertation: Building a Foundation of Next-Generation Environmental Infectious Disease Surveillance: Cross-disciplinary and Fit-for-Purpose Tool Development for Wastewater-Based Epidemiology and Indoor Pathogen Monitoring.

Christopher Alonso Azaldegui, Field of Specialization: Chemical Biology. Dissertation: Mechanisms of Subcellular Organization in Bacteria.

Shreeya Bakshi, Field of Specialization: Pharmacology. Dissertation: Better Retained than Forgotten: Investigation of *SCN1B* intron 3 Retention and Its Link to Developmental and Epileptic Encephalopathy.

Deepthi Bathala, Field of Specialization: Architecture. Dissertation: Botanical Failures: Gardens and Climate Imaginaries in Colonial South Asia.

Elizabeth Jean Bealer, Field of Specialization: Biomedical Engineering. Dissertation: Immunomodulation Using Engineered Nanoparticles: Strategies for Protecting Transplanted Islets.

Armand Bahram Behrooz, Field of Specialization: Computer Science and Engineering. Dissertation: Data-Aware Computing for Efficient Extended Reality Systems.

Andrea Maria Bejarano, Field of Specialization: Electrical and Computer Engineering. Dissertation: Resource-Constrained Intelligent Edge Systems for Internet-of-Things Applications.

Matthew Richardson Belz, Field of Specialization: Electrical and Computer Engineering. Dissertation: Low Noise Frequency Synthesis Techniques.

Janae Nicole Best, Field of Specialization: Health Behavior and Health Equity. Dissertation: Returning the Cape: Deepening Our Understanding of the Relationship Between Superwoman Schema and Mental Health Among Young Black Women Attending An HBCU.

Ananyo Bhattacharya, Field of Specialization: Climate and Space Sciences and Engineering. Dissertation: Perspectives from the Juno Microwave Radiometer: Probing Jupiter's Deep Rock Clouds, Thermochemistry and High-Energy Electron Precipitation over Northern Aurora.

Saraí Blanco Martinez, Field of Specialization: Education and Psychology. Dissertation: "This is a Healing Space": Cultivating Latinx Immigrant-Origin Youth's Radical Healing Practices.

Layne G. Bond, Field of Specialization: Chemical Biology. Dissertation: Characterization and Application of Blood-Brain Barrier Penetrating Bispecific Antibodies Targeting Transferrin Receptor and CD98hc.

Rory Patrick Bowens, Field of Specialization: Astronomy and Astrophysics. Dissertation: Using GeoSnap Mid-Infrared Detectors for Exoplanet Research on Large Telescopes.

Allison Marie Box, Field of Specialization: Molecular, Cellular and Developmental Biology. Dissertation: The *Drosophila* Accessory Gland as a Model for Postmitotic Regeneration.

Elliott Scott Brannon, Field of Specialization: Health Infrastructures and Learning Systems. Dissertation: The Work and Workers of Centering Patients in Quality Improvement Networks.

An alum of the University of Michigan.

It's a title that will stick with you from this day forward. On behalf of the Alumni Association of the University of Michigan, welcome. We are so glad to have you among our ranks.

Today is a momentous day. Celebrate it. Relish in it. But tomorrow, when you begin to figure out what comes next, we are here for you.

As a graduation gift, we are giving each of you a one-year membership to the Alumni Association. Keep an eye on your inbox for a message on how to access it.

No matter where you call home tomorrow, you'll never be far away from the University of Michigan as long as you are a part of the Alumni Association. No other organization knows that Wolverine state of mind better. The Maize and Blue that runs through your veins. That kindred spirit you feel when you see someone in a place as far away as China wearing a U-M T-shirt. We know that feeling. In fact, there are more than 672,000 of us who know that feeling.

The Alumni Association is the best way to maintain the tie with a place that has been woven into your DNA.

As you get started on your professional journey, we are alongside you as well. **Scan the QR code below to learn more about our services, including access to career coaches, webinars to learn how to write killer resumes, a job board, and so much more.**

Congratulations and welcome to our Michigan alum community! Forever, Go Blue!

Nondiscrimination Policy Statement

The University of Michigan is an equal opportunity employer and complies with all applicable federal and state laws regarding nondiscrimination. The University of Michigan is committed to a policy of equal opportunity for all persons and does not discriminate on the basis of race, color, national origin, age, marital status, sex, sexual orientation, gender identity, gender expression, disability, religion, height, weight, or veteran status in employment, educational programs and activities, and admissions. Inquiries or complaints may be addressed to the Equity, Civil Rights, and Title IX Office at 1009 Greene Street, 2030 ASB, Ann Arbor, MI 48109-1432, 734-763-0235, ecrt.umich.edu.

Freedom of Expression Statement

Thank you for attending this event.

Along with many other college campuses, we occasionally encounter disruptions during campus events. When that happens we strive to de-escalate the disruption and continue with the event. We appreciate your cooperation and understanding.

As a public university and an institution committed to diversity of thought and freedom of expression, the University of Michigan has many forums where members of the University community, speakers, artists, invited guests, and/or the general public can express their views and opinions. Yet not all University spaces or events are forums where everyone is invited to speak, perform, or gather.

No one is entitled to substantially disrupt the lawful speech or activities of others.

If the hosts of this event or university representatives believe that disruptions are interfering unduly with an event, they will, typically, warn the disruptors, and if the warnings are not heeded, then the disruptors may be removed from the event.

THE YELLOW AND BLUE

Sing to the colors that float in the light;
Hurrah for the Yellow and Blue!
Yellow the stars as they ride thro' the night,
And reel in a rollicking crew;

Yellow the fields where ripens the grain,
And yellow the moon on the harvest wain – Hail!

Hail to the colors that float in the light;
Hurrah for the Yellow and Blue!

THE VICTORS

Hail! to the victors valiant,
Hail! to the conqu'ring heroes,
Hail! Hail! to Michigan
the leaders and best.

Hail! to the victors valiant,
Hail! to the conqu'ring heroes,
Hail! Hail! to Michigan
the champions of the West!
